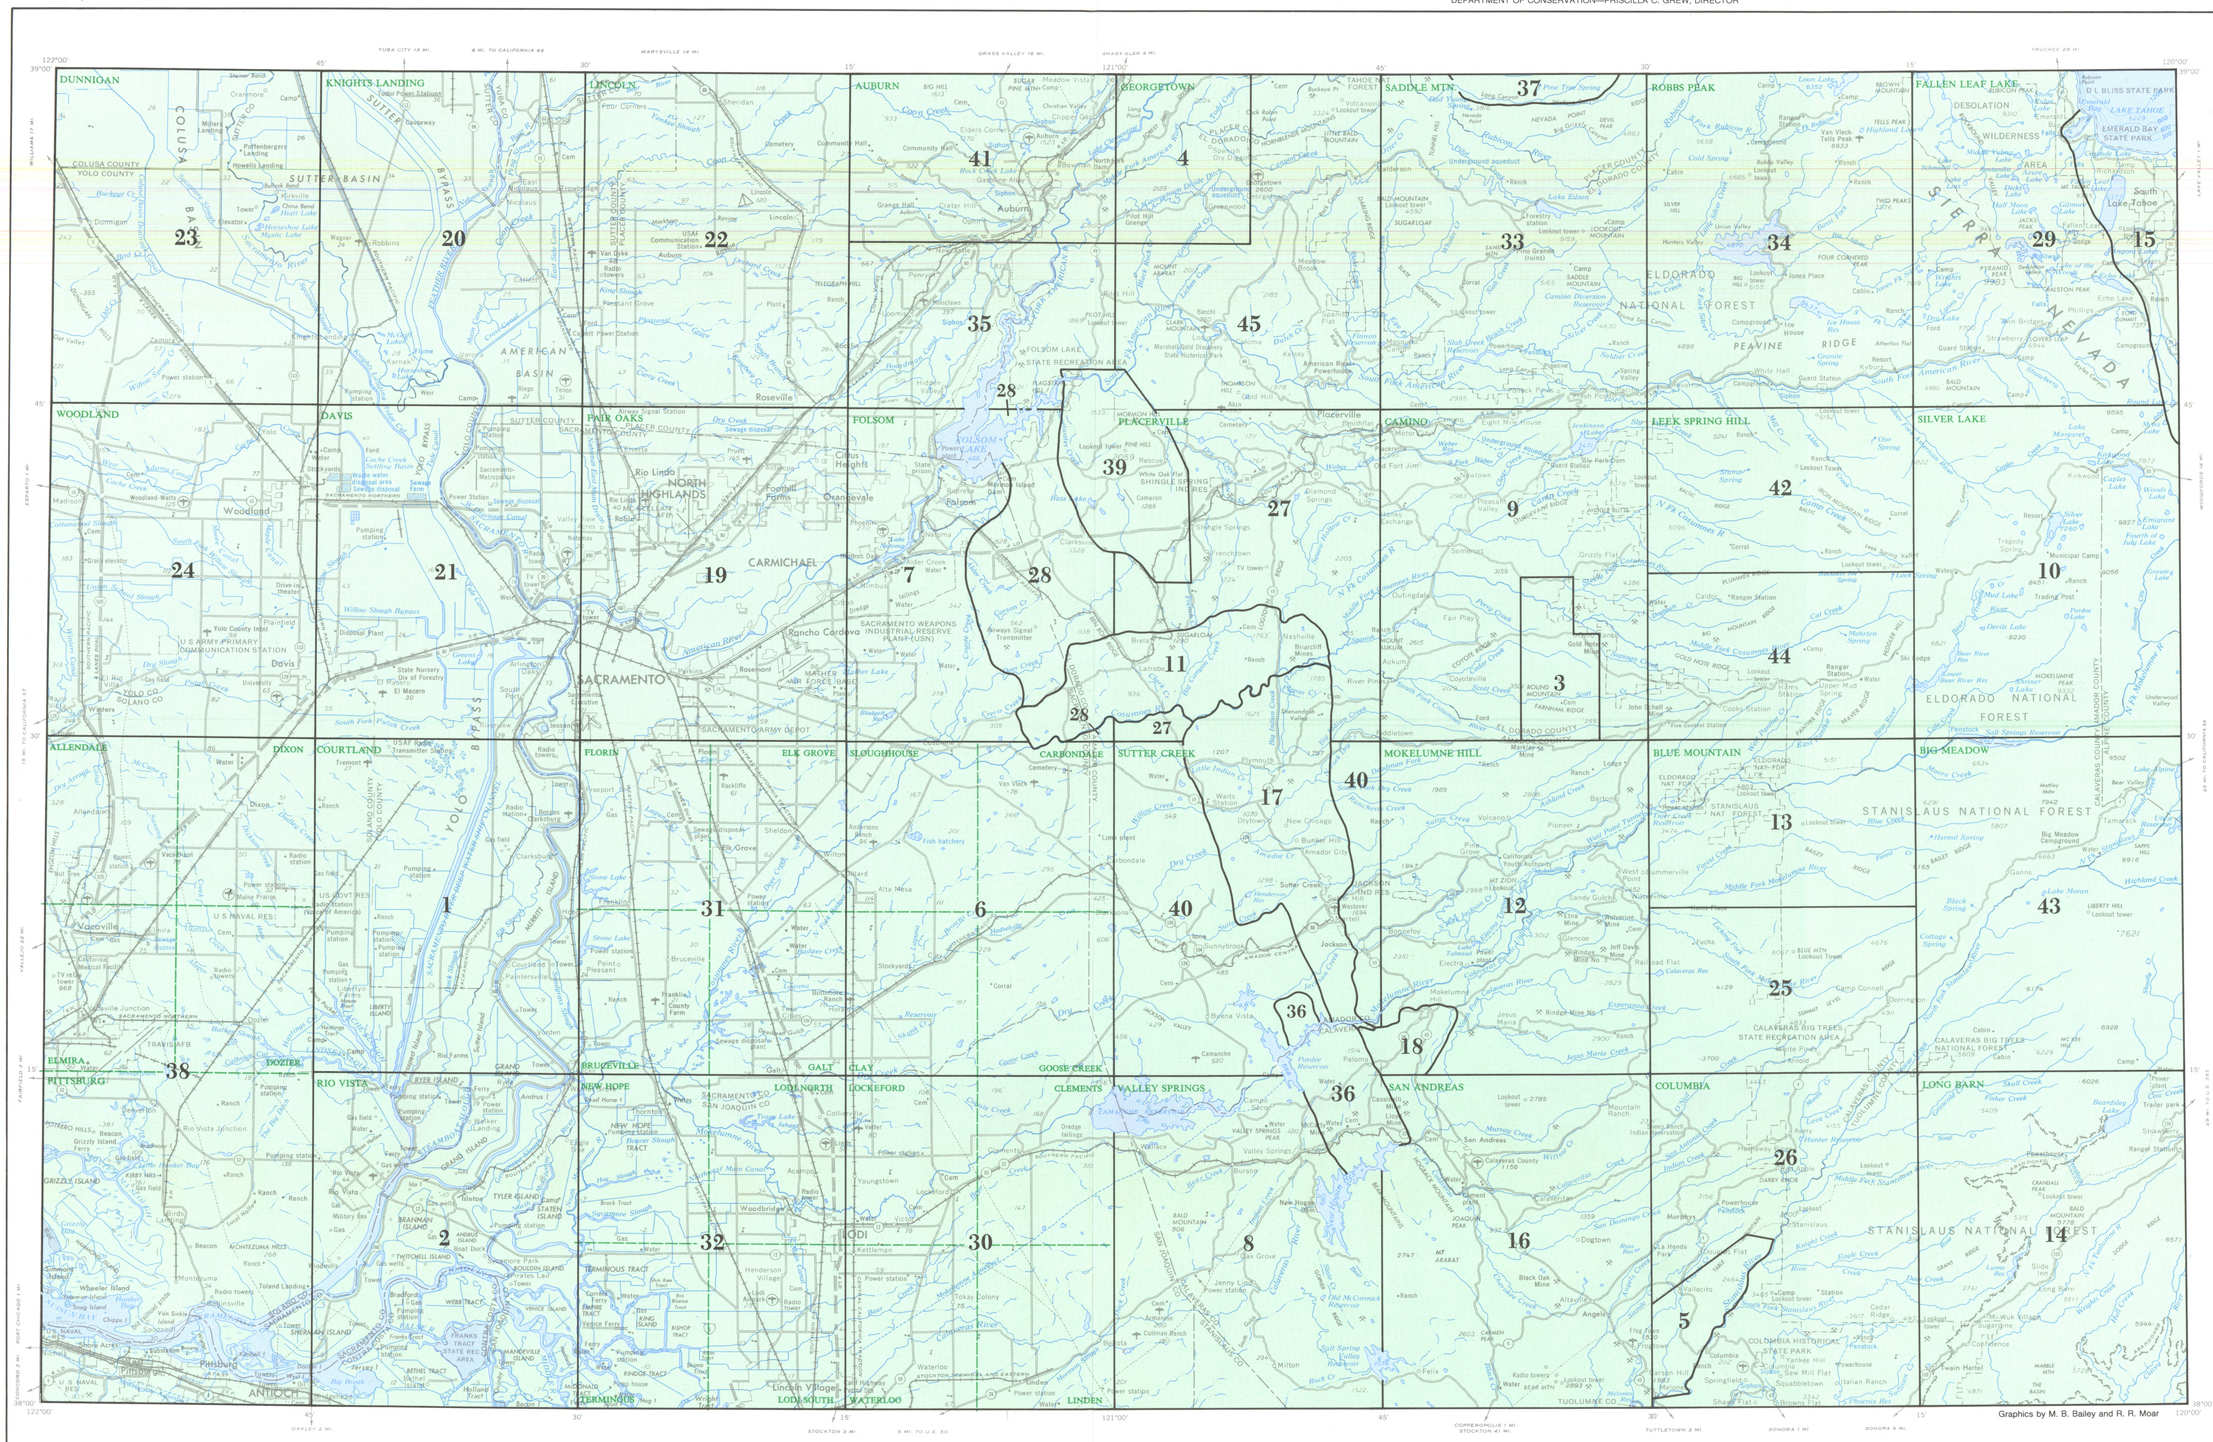
CALIFORNIA DIVISION OF MINES AND GEOLOGY
JAMES F. DAVIS, STATE GEOLOGIST

STATE OF CALIFORNIA—EDMUND G. BROWN JR, GOVERNOR
THE RESOURCES AGENCY—HUEY D. JOHNSON, SECRETARY
DEPARTMENT OF CONSERVATION—PRISCILLA C. GREW, DIRECTOR



Williams & Heintz Map Corporation, Capitol Heights, Md. 20743

INDEX TO GE
OF THE SACRAM

D. L. W

1. Atwater, B., 1979, Unpublished geologic maps of Quaternary deposits of th
Saxon, Clarksburg, Liberty Island, and Courtland 7½-minute quadrangle
scale 1:24,000. *(Midland fault from* Redwine, L.E., 1972, The Tertiar
Princeton submarine valley system beneath the Sacramento Valley, Califo
nia: University of California, Los Angeles, unpublished Ph.D. thesis, 479 p
Figure 17, scale 1" = 6.5 miles.)

2. Atwater, B., 1979, Generalized geologic map of the Rio Vista 15-minut
quadrangle, California: U.S. Geological Survey Open File Report 79-853
scale 1:62,500 (*Midland fault from* Redwine, L.E., 1972, The Tertiar
Princeton submarine valley system beneath the Sacramento Valley, Cal
fornia: University of California, Los Angeles, unpublished Ph.D. thesis
479 p., Figure 17, scale 1"=6.5 miles.)

3. Aune, Q.A., 1965, Geology of the Indian Diggings limestone deposit: Cal
fornia Division of Mines and Geology Open File Report, scale 1:62,50
(*Eastern boundary of the Calaveras Complex from* Schweickert, R.A.
1979, Lamont-Doherty Geological Observatory, Columbia Universit
written communication and unpublished maps.)

4. Aune, Q.A., 1979, Geologic reconnaissance of the Greenwood 7½-minut
quadrangle: unpublished field study for State Map Project, scale 1:24,00
In part after Turner, H.W., Lindgren, Waldemar, 1894, Geologic Atlas o
the United States, Placerville Folio: U.S. Geological Survey Folio 3, scal
1:125,000 (*Modifications by* Wagner, D.L., 1979, California Division o
Mines and Geology.)

5. Baird, A.K., 1962, Superposed deformations in the central Sierra Nevad
foothills, east of the Mother Lode: University of California Publications i
Geological Sciences, v. 42, no. 1, p. 1–70, Figure 2, scale 1:24,725. (*Subdiv
sion of Baird's "Tertiary Gravels"* by Jennings, C.W., 1979, unpublishe
field study for State Map Project, scale 1:62,500.)

6. Bartow, J.A., and Marchand, D.E., 1979, Preliminary geologic map
Cenozoic deposits of the Clay area, California: U.S. Geological Survey Ope
File Report 79-667, scale 1:62,500. (*Pre-Cenozoic bedrock from* Clark
L.D., 1964, Stratigraphy and structure of part of the western Sierra Nevad
metamorphic belt, California: U.S. Geological Survey Professional Pape
410, 70 p., Plate 1, scale 1:316,800.)

7. Bartow, J.A., and Helley, E.J., 1979, Preliminary geologic map of Cenozo
deposits of the Folsom area, California: U.S. Geological Survey Open Fi
Report 79-550, scale 1:62,500. (*Pre-Cenozoic bedrock from* Lindgre
Waldemar, and Turner, H.W., 1894, Geologic Atlas of the United State
Placerville Folio: U.S. Geological Survey Folio 3, scale 1:125,000.)

8. Bartow, J.A., and Marchand, D.E., 1979, Preliminary geologic map
Cenozoic deposits of the Valley Springs quadrangle, California: U.S. Geo
logical Survey Open File Report 79-436, scale 1:62,500.
Pre-Cenozoic bedrock from:
a) Turner, H.W., 1894, Geologic Atlas of the United States, Jackson Folio
U.S. Geological Survey Folio 11, scale 1:125,000.
b) Clark, L.D., 1964, Stratigraphy and structure of part of the wester
Sierra Nevada metamorphic belt, California: U.S. Geological Survey Profes
sional Paper 410, 70 p., Plate 1, scale 1:316,800.
Fault near Valley Springs from: Pacific Gas and Electric Company, 1979
Stanislaus Nuclear Project Site Suitability-Site Safety Report (unsubmit
ted): Woodward-Clyde Consultants, Foothills Fault Study, v. 6, Append
C.4, Figure C.4-2.

9. Bedrossian, T.L., 1979, Geologic reconnaissance of the Camino 15-minut
quadrangle: unpublished field study conducted for State Map Project, scal
1:62,500; *geology modified from* Lindgren, Waldemar, and Turner, H.W.
1894, Geologic Atlas of the United States, Placerville Folio: U.S. Geologic
Survey Folio 3, scale 1:125,000.
Additional data from:
a) U.S. Forest Service, 1972, Geomorphic land stratification maps of por
tions of the Omo Ranch and Sly Park 7½-minute quadrangles: Eldorad
National Forest, scale 1:20,000.
b) Wheeldon, G.A., 1977, Study of the Pleasant Valley planning area, E
Dorado County, California: unpublished report, 34 p., Appendix E, geolog
ic map, scale 1"= 16,400".
c) Schweickert, R.A., 1979, Lamont-Doherty Geological Observatory, Co
lumbia University, written communication and maps (for location of east
ern boundary of the Calaveras Complex).

10. Bedrossian, T.L., 1979, Geologic reconnaissance of the Silver Lake 15-
minute quadrangle: unpublished field study for State Map Project, scale
1:62,500; *geology modified from* Lindgren, Waldemar, 1896, Geologic At
las of the United States, Pyramid Peak Folio: U.S. Geological Survey Folio
31, scale 1:125,000.
Additional data from:
a) Beeby, D.J., 1970, Geology of the NW¼ of the Silver Lake quadrangle
Eldorado National Forest Progress Report, 37 p., scale 1:24,000.
b) U.S. Forest Service, 1972, Geomorphic land stratification map of a
portion of the Silver Lake 15-minute quadrangle: Eldorado National For
est, scale 1:20,000.
(Aerial photo-analysis of lineaments and joints by: Bedrossian, T.L., 1979
California Division of Mines and Geology, scale 1:62,500.)

11. Behrman, P.G., 1978, Paleogeography and structural evolution of a middle
Mesozoic arc-continental margin; Sierra Nevada foothills, California: Uni
versity of California, Berkeley, unpublished Ph.D. thesis, 301 p., scale
1:12,000.

12. Bortugno, E.J., 1979, (with field assistance from G.J. Saucedo), Geologic
reconnaissance of the Mokelumne Hill 15-minute quadrangle: unpublished
field study for State Map Project, scale 1:62,500; *geology modified from*
Turner, H.W., 1894, Geologic Atlas of the United States, Jackson Folio
U.S. Geological Survey Folio 11, scale 1:125,000. *Eastern boundary o*
Calaveras Complex from Schweickert, R.A., 1979, Lamont-Doherty Geo
logical Observatory, Columbia University, written communication and
maps.

13. Bortugno, E.J., 1979, Geologic reconnaissance of the north half of the Blue
Mountain 15-minute quadrangle: unpublished field study for State Map
Project, scale 1:62,500; *geology modified from* Turner, H.W., and Ran
some, F.L., 1898, Geologic Atlas of the United States, Big Trees Folio: U.S
Geological Survey Folio 51, scale 1:125,000.

14. Bortugno, E.J., 1979, Geologic reconnaissance of the Long Barn 15-minut
quadrangle: unpublished field study for State Map Project, scale 1:62,500
geology modified from Turner, H.W., and Ransome, F.L., 1898, Geologic
Atlas of the United States, Big Trees Folio: U.S. Geological Survey Folio
51, scale 1:125,000.

15. Burnett, J.L., 1971, Geology of the Lake Tahoe basin: California Geology
v. 24, no. 7, p. 119–129, scale 1:125,000.
