

Toro Canyon Fan, Riverside County

Pinto Basin, Riverside County

Santa Rosa Mountains, San Diego County

ALLUVIAL FAN

2016

An alluvial fan is a low, outspread mass of loose materials and/or rock material, commonly with gentle slopes, shaped like an open fan or a segment of a cone, deposited by a stream (best expressed in semiarid regions) at the place where it issues from a narrow mountain or upland valley; or where a tributary stream is near or at its junction with the main stream. It is steepest near its apex which points upstream and slopes gently and convexly outward (downstream) with a gradual decrease in gradient. *(Glossary of Landform and Geologic Terms, Natural Resources Conservation Service, www.nrcs.usda.gov.)*
