Career Advancement Options

- Associate Oil and Gas Engineer
- Senior Oil and Gas Engineer
- Supervising Oil and Gas Engineer

The Division of Oil, Gas, and Geothermal Resources oversees the drilling, operation, maintenance, and plugging and abandonment of oil, natural gas, and geothermal wells. The regulatory program emphasizes the wise development of oil, natural gas, and geothermal resources in the state through sound engineering practices that protect the environment, prevent pollution, and ensure public safety.

Working in the oil and industry is an exciting choice that allows for a career with longevity. Engineering Geologists perform interesting and intellectually stimulating work, often traveling on & off road to work locations throughout California. Other functions of the Engineering Geologist may include:

- Conducting geologic investigations, including the design and implementation of field monitoring programs.
- Conducting field inspections and studies to ensure compliance with statutes and regulations.
- Assessing and documenting the evaluation of oil and gas wells, injection wells and facilities for environmental hazards.
- Analyzing groundwater issues.

BENEFITS INCLUDE:

- Flexible Work Hours
- Paid Holidays
- Paid Vacation
- Sick Leave
- Health Coverage
- Dental
- Vision
- Great Retirement Savings Plus Plans (457 & 401K)
- Public Service Loan Forgiveness (may be eligible)

Are You Qualified?

Equivalent to graduation from college with major work in geology, engineering geology, or a closely related field that includes coursework in geology. Additional qualifying experience may be substituted for the required education on a year-for-year basis. Registration as a senior in a recognized institution will admit applicants to the Engineering Geologist examination, but they must produce evidence of graduation or its equivalent before they can be considered eligible for appointment.
