ITEM 3 -- Consideration of Preparing Staff Procedural Guidelines for Surface Mine Inspections

BACKGROUND: The Surface Mining and Reclamation Act of 1975 (SMARA, Public Resource Code §2710 et seq.) requires that surface mines in the State be inspected not less than annually by the lead agency pursuant to PRC §2774(b). When the SMGB is the SMARA lead agency, it is responsible for conducting the mandated inspections. The SMGB has accomplished these inspections through contracting professional services from the private sector, or by contracting for professional services from the Department of Conservation’s Office of Mine Reclamation.

In order to ensure that these inspections are thorough, uniform, and in accordance with the requirements of SMARA, the SMGB proposed that guidelines for SMGB use as a lead agency be developed by the Surface Mining Standards Committee.

The attached draft guidelines divide the inspection process into three phases: Pre-Mine Inspection activities; Mine Inspection activities; and, Post-Mine Inspection activities. The activities listed under each of these headings are provided in bullet form in this draft for discussion purposes.

COMMITTEE ACTIONS: The Committee is requested to review the activities in the proposed guidelines, and provide additional guidance for the preparation of the guidelines. Following Committee input, SMGB staff will prepare a draft guideline report to present to the Committee for its consideration and acceptance for recommending to the SMGB for adoption.
