1 Woodland Hills, California, Wednesday, February 1, 2017  
2  
3  
4  
5 MR. MCGEE: Good evening, everyone. Shall we start  
6 our meeting? Good evening. Thank you very much for  
7 coming. Thank you. First thing's first. I'm going to  
8 start with some safety and logistics announcements and  
9 then we'll get right to the meeting. All of the doors of  
10 this room -- I'll wait just a moment. All of the doors in  
11 this room can be used as an exit and there will be either  
12 green or red exit signs that point you to the outside.  
13 That's a good way to go. If anything should happen -- we  
14 do not expect it, we do not want it to happen -- any of  
15 these exit doors outside of the building must well away  
16 from building. Restrooms are right outside to the left,  
17 my left over here. For parking this evening, the hotel --  
18 if you tell them that you were at this event will charge  
19 \$10 not 19. All you have to do is tell them. You don't  
20 need a stamp or anything like that.  
21 We are close to capacity in the room. It looks  
22 pretty good right now. Law enforcement officials as well  
23 as the hotel policy wants to make sure that we're  
24 clean-keeping access ways clear so to the extent possible  
25 if we can move into the room we can even try to find a

5

1 couple spots for more chairs as long as we're not blocking  
2 egress, but we are getting close to capacity and we will  
3 have -- if we bump up against that we'll have to figure  
4 out what to do. We can't go over fire code. We do have  
5 another meeting tomorrow night, but I'd have to ask you to  
6 come back right here.  
7 Last thing for this before I actually start  
8 talking about the meeting, there is a policy -- a hotel  
9 policy of no signs. I see that you do have some signs here.  
10 They're small and so what I would ask you to do is keep  
11 them close, be mindful of your neighbors and their line of  
12 sight and what they need, so these are good places to hold  
13 your sign. So I would like to leave at that, if that's  
14 possible, if we could do that. I don't want to go up  
15 against that, that rule. I want to respect their desire  
16 to be here, if that's okay. About this meeting, my name is  
17 Caelan McGee. I am a facilitator. I work for a group  
18 called the Center for Collaborative Policy, which is the  
19 independent center of Sacramento State University and has  
20 been for 25 years.  
21 Our mission is to support collaborative  
22 strategies to improve policy decisions. I have a team of  
23 facilitators here today with my team; mine is raising their  
24 hand at the moment. There are six of us here tonight. We  
25 have a couple in the back of the room. You'll see us as

6

1 we go. We, that team I just mentioned, are committed to  
2 genuine discussions and useful meanings, and I don't ask  
3 you to trust me on this. You can watch us and just see  
4 how we do, and of course make up your own mind. The  
5 purpose of this meeting tonight is to collect comment on  
6 the safety review process for Aliso Canyon Natural Gas  
7 Storage Facility, as called for understand Senate Bill 380.  
8 I can tell by the turnout, by the press, by the emotion of  
9 the communications, in advance of this meeting how important  
10 this is to you. These are your homes and your health and  
11 a lot is at stake and thank you for coming to express this  
12 tonight.  
13 PUBLIC: [APPLAUSE]  
14 MR. MCGEE: The focus of this meeting, as I mentioned,  
15 is to collect comment on the safety review process and  
16 also we understand that you have concerns about this  
17 facility that go well beyond the safety review process,  
18 and therefore, the California Public Utilities Commission  
19 will also be presenting tonight on a forthcoming  
20 proceeding that will ask larger questions about this  
21 facility and energy infrastructure in Southern California.  
22 So you're going to hear about that tonight, meaning this  
23 is not the last discussion. This one is thought focused  
24 on the safety review.  
25 Some of you might have learned in the last

7

1 number of days when we published the first agenda for  
2 this meeting that we were going to try small breakout  
3 groups and discussions. That meeting design was my idea.  
4 I actually talked these agencies into that idea because  
5 that is an effective way that we've had some conversations  
6 on complex topics with this many people in a room.  
7 However, we heard loud and clear that that felt like an  
8 attempt to silence you or to divide and conquer you or --  
9 anyway, we heard very specific feedback that said that's  
10 not the type of meeting that you want on this topic at this  
11 time. Therefore, we changed the agenda and here it goes --  
12 you got this on your chairs.  
13 We're going to start with some opening comments,  
14 me obviously, and then we're going to hear from the agencies.  
15 Then we will go to two presentations that are brief, somewhat  
16 technical. These are also available online. The DOGGR  
17 presentation has been pre-recorded and is available online  
18 before and after the meeting. After the presentation for  
19 the Division and from CQC regarding their proceeding, we  
20 will have a section for elected officials first and then  
21 community representatives to speak. Then we're going to  
22 turn to public comment and I'm going to make a promise to  
23 you that as many people want to speak tonight will get a  
24 chance to.  
25 Obviously, we have to apportion or limit time

8

1 in some way to cycle through the so many limited people  
2 here -- excuse me, the -- so many people that are here  
3 today and so I have instructions for that later on how  
4 we're going to que up and how we're going to pass the mic.  
5 We're not going to make you stand in a line for two hours  
6 waiting to take your comment. We are going to find a way  
7 to get the comments around the room, so I'll be back with  
8 more instructions on that piece.  
9 Just a couple more things and we're going to  
10 get started. Like I said, elected officials -- after all  
11 they are elected officials -- to speak and represent and  
12 listen to you; and also we invited some community and other  
13 interest representatives to speak in advance in public  
14 comment. We wanted some different voices, some different  
15 perspectives, and here's the trick for tonight: I want to  
16 give them adequate time say what they need and I think I  
17 want that -- I think specially you want to get to public  
18 comment as soon as possible, so I'm going to be asking  
19 everybody tonight to say what they need and be as brief  
20 as possible so we can hear as much as we can. During the  
21 public comment, I've already mentioned that, didn't want  
22 to make you stand in lines. We'll provide instructions on  
23 how we're going to do that, but again, I promise you we  
24 will say: A. We have tomorrow night if you want, if the  
25 timing doesn't work out for tonight. B. We will -- we will

9

1 take comments as many comments as there are. Everybody who  
2 wants to speak will. At 9:00 o'clock, because we said we  
3 would end at 9:00, I'm going to do a check just before  
4 9:00 o'clock and see if there are closing comments or see  
5 if there are observations that agencies want to make and  
6 then at that point, if you -- if there are some other  
7 comments that you want to be made or you want to stay and  
8 listen to those public comments, great, we will stay.  
9 Two more things and I'm done. First of all,  
10 regarding comments and how to make comments tonight. We  
11 do have a stenographer over here, so there's going to be  
12 a full transcript from everything that is said tonight and  
13 that will be on that record. Second, we are going to  
14 produce a mean summary from this meeting that will  
15 summarize general and key themes from this meeting and that  
16 will be posted. I highly encourage anybody that has  
17 specific responses or specific information to submit a  
18 written comment through the Conservation website because  
19 those will be collected and processed according to their  
20 system, so I want to -- if specially if you want it  
21 acknowledged that it was received or that you have specific  
22 information that you want to submit -- highly encourage you  
23 to do that as an electronic or written submission through  
24 the website. If you want to write something -- if you have  
25 information tonight, if you brought like a study or

10

1 technical info or another article -- where's Sarah? I need  
2 you to stand up. Will you join me up here for just a second?  
3 This is my colleague, Sarah Dilatorio [phonetic]. Find me or  
4 anybody else but specially this person and have this person  
5 that study or that paper or whatever it is that you want to  
6 bring. Thank you, Sarah.  
7 Here's the last thing I'm going to say and we're  
8 going to get going. Two things I'm going to say: The first  
9 is, tonight is generally geared towards collecting your  
10 comments and your questions. There are not a lot of  
11 opportunities for answers and response tonight and that's  
12 because of how many are here, and we want to focus on  
13 collecting your comments. So it's important and I realize  
14 that might not be entirely satisfying. That is the focus  
15 and the structure of tonight. Here's the last thing I want  
16 to say: I work with a lot of agencies and do the things  
17 like this and other multi-state [UNINTELLIGIBLE] groups that  
18 try to work through solutions. I genuinely believe that  
19 these agencies are actually here to listen to you and your  
20 concerns tonight and once again, I do not -- hold on a  
21 second.  
22 PUBLIC: [CROWD BOOING]  
23 MR. MCGEE: Hold on a second. I don't ask you to  
24 trust me on that. As with everything -- hold on, please.  
25 As with everything, you get to decide for yourselves, but

11

1 I'm telling you as an independent party that's working to  
2 help pull off a good meeting. that's my mission is to help  
3 agencies talk to each other and help agencies talk to  
4 their publics. I believe these agencies are here to  
5 listen to you. Likewise, you're going to hear from them  
6 that they are very confident in their safety review process  
7 and measures and so one of our goals tonight, I think, is  
8 open mind. I'm pretty sure that you want to make sure  
9 that these agencies are actually listening to you and  
10 considering your comments before they make their  
11 decisions; right? You want them to have an open mind.  
12 Likewise, I'm going to ask you now to listen closely and  
13 keep an open mind that what they have to say about their  
14 safety review process, knowing that you get to make up  
15 your own mind and you get to speak for yourselves.  
16 With that, I would like to introduce three  
17 concepts for all of our discussions tonight: I have them  
18 as ground rules in a couple places. They're very simple.  
19 The first is be concise. We've already mentioned the goal  
20 tonight is to hear for as many as possible and get a lot of  
21 people that want to speak. The second is emotions are  
22 definitely okay because this is very important to you.  
23 However, accusations meaning, "They're trying to do this  
24 to me," or "I -- they think this." Or "The reasons that are  
25 doing that -- " that's actually speaking for somebody else.

12

1 Please speak for yourself. Let us know what you want,  
 2 what you're most worried about, what your questions are,  
 3 okay? And finally, one speaker at a time just so that  
 4 there's no interruption and we respect everybody that's  
 5 speaking. I might have to stop and -- and help us do that,  
 6 but I hope not. Here we go. This is a very important  
 7 topic. Thank you very much for coming. And I'm going to  
 8 turn to Ken Harris from the Division of Oil, Gas,  
 9 Geothermal to start.

10 MR. HARRIS: Good evening, everyone. Thank you for  
 11 coming. We appreciate your attendance. This meeting  
 12 represents a milestone in our effort to make certain  
 13 determinations about the future of Aliso Canyon. We are  
 14 interested in hearing what you have to say. We've been  
 15 working very hard with a team of engineers to implement  
 16 what we believe is one of the strictest and most  
 17 comprehensive set of testing regimes applied to any  
 18 gas field in the United States.

19 UNIDENTIFIED SPEAKER: Good evening, everybody.  
 20 Porter Ranch residents, please stand up in front in  
 21 solidarity for Porter Ranch. Please stand in solidarity  
 22 for Porter Ranch.

23 PUBLIC: [INAUDIBLE].

24 MR. MCGEE: Folks. Folks. So a lot of people came  
 25 here tonight to attend this meeting and they did not sign

13

1 to come up to your meeting. A lot of people came to  
 2 listen.

3 UNIDENTIFIED SPEAKER: This is our public meeting.  
 4 Who would like to hear what Porter Ranch has to say?

5 PUBLIC: [PUBLIC CHEERING]

6 MR. MCGEE: Stop. Stop. Not only, not only are we  
 7 going to allow him to speak, we are going to allow him to  
 8 speak. Excuse me, I'm trying --

9 PUBLIC: [PUBLIC CHANTING] Let him speak. Let him  
 10 speak.

11 MR. MCGEE: I'm trying -- I'm trying. I can't speak  
 12 while I'm doing this -- I can't let you speak while you're  
 13 doing this. Listen, no. Listen. Stop that. Stop that.  
 14 Now, stop that. We'll give you a moment to leave you to  
 15 speak. This is not helping.

16 PUBLIC: [PUBLIC CHANTING]

17 MR. MCGEE: You have just stopped the proceedings.  
 18 You just stopped the proceedings.

19 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] I want to  
 20 welcome our elected officials. Please note that we  
 21 definitely want to hear from you as planned and we respect  
 22 your time and that has not changed. We are not here to  
 23 stop any proceedings. We want to hear from you. We  
 24 insist our regulators hear from you no matter what and  
 25 make your comments on the record. We are here -- we are

14

1 here to give more time to the public to speak, more for  
 2 you to be heard or who wants more people to be heard?

3 PUBLIC: [PUBLIC CHEERING]

4 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] We are still  
 5 concerned that this hearing format is the same for format  
 6 that we have heard over and over again for 15 months.

7 PUBLIC: [PUBLIC CHANTING]

8 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] the city  
 9 people and all you people have come all this way to make  
 10 sure that you hear us.

11 PUBLIC: [CHEERING]

12 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] all this  
 13 information is available online. Many people have read  
 14 it. We've seen the videos. It's all available all the  
 15 time right now. What is not available [UNINTELLIGIBLE].

16 PUBLIC: [UNINTELLIGIBLE]

17 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] and we are  
 18 regularly sick and experiencing symptoms of exposure.  
 19 [UNINTELLIGIBLE] have the headaches, nose bleeds, nausea,  
 20 dizziness, rashes, respiratory complications and many  
 21 other health problems; we will hear that about tonight.  
 22 People are reporting cancers and leukemia and other  
 23 horrible health issues. They are [UNINTELLIGIBLE] the  
 24 Aliso Canyon.

25 UNIDENTIFIED SPEAKER: Shut it down. Shut it all

15

1 down.

2 UNIDENTIFIED SPEAKER: When they used Aliso Canyon for  
 3 the first time in a year last week, dozens of  
 4 residents called the health department reporting illnesses  
 5 [UNINTELLIGIBLE].

6 PUBLIC: [UNINTELLIGIBLE].

7 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] your mission  
 8 statement says, and I quote, "Preventative damage to life,  
 9 health, property and natural resources." End quote.  
 10 [UNINTELLIGIBLE] we made clear that if the operation of  
 11 this facility results in our illness, then this facility is  
 12 not safe.

13 PUBLIC: [CHANTING]

14 UNIDENTIFIED SPEAKER: If cannot absolutely state the  
 15 [UNINTELLIGIBLE] root case analysis completed, what caused  
 16 the blowout, then you cannot say that this facility is  
 17 safe.

18 PUBLIC: [CHEERING]

19 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] then to review  
 20 is Governor Jerry Brown is to shut it all down.

21 PUBLIC: [CHANTING] Shut it all down. Shut it all down.

22 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] we will hear  
 23 from some of our children.

24 PUBLIC: [CHEERING]

25 UNIDENTIFIED SPEAKER: Unless you want this.

16

1 PUBLIC: [UNINTELLIGIBLE]  
 2 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] and after you  
 3 hear from all us we will gladly hear your presentation.  
 4 [UNINTELLIGIBLE].  
 5 MR. MCGEE: That's a fine meeting, but we're not going  
 6 to adopt that agenda. We're going to shut down this  
 7 meeting before we have that agenda.  
 8 PUBLIC: [CHANTING.] We are the public. We are the  
 9 public.  
 10 UNIDENTIFIED SPEAKER: If you would like to go with  
 11 the new proposed agenda --  
 12 MR. MCGEE: No. We're going to shut down this  
 13 meeting. You're not going to do this.  
 14 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE]  
 15 MR. MCGEE: Not everyone is standing. Not everyone is  
 16 standing. Okay. I'm going to shut down this meeting in  
 17 five minutes. I'm going to stop this meeting. If you  
 18 don't stop talking, I'm going to stop this meeting. I'm  
 19 going to [UNINTELLIGIBLE] and speak, but you need to let me  
 20 start this meeting or I'm going to stop this meeting and  
 21 you can all go home. Stop. That's not okay. That sign  
 22 is not okay. All right. All right. No. No. No. I'm  
 23 going to -- you either give me a chance to give you a  
 24 chance to speak or I'm going to stop the meeting. What  
 25 would you like? Nothing can happen while you're doing

17

1 this. Nothing can happen while you're doing this.  
 2 Nothing can happen while you're doing this. No.  
 3 PUBLIC: [CHANTING]  
 4 MR. MCGEE: I will try to let you speak, but this is  
 5 not speaking. This is not speaking. Okay. I will stop  
 6 the meeting. [UNINTELLIGIBLE] let me explain. Let me  
 7 explain. This is getting nowhere. This is doing nothing.  
 8 PUBLIC: [UNINTELLIGIBLE]  
 9 UNIDENTIFIED SPEAKER: Let us speak.  
 10 MR. MCGEE: Okay. So we're very close to canceling  
 11 this meeting unless you let me -- unless you let me make  
 12 space for you all to speak we're going to close this  
 13 meeting. This is [UNINTELLIGIBLE].  
 14 MR. MCGEE: I need you to listen. I need you to  
 15 listen. I need you to listen. Please listen.  
 16 Please listen. Please listen. This is shameful. Excuse  
 17 me. This is shameful. This is shameful. This is  
 18 shameful. This is shameful. Porter Ranch, you're better  
 19 than this. You are better than this. You are better than  
 20 this. You are better than this. Please. Please.  
 21 UNIDENTIFIED SPEAKER: We've been silenced too long.  
 22 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE]  
 23 MR. MCGEE: [UNINTELLIGIBLE] How many people, how many  
 24 people came to speak tonight? This is no way to hold a  
 25 public meeting. There is no [UNINTELLIGIBLE]. The

18

1 stenographer can hear nothing. No. Nobody can hear  
 2 anything over this. No. No this is not [UNINTELLIGIBLE]  
 3 this is not your meeting. This is not your meeting. You  
 4 can hold your own meeting. There are many people who came  
 5 to this meeting. It is not. No. No, because, because  
 6 many people came to comment. Not just on this. And we  
 7 want to make space for this and other things. This is not  
 8 a meeting. This is shameful.  
 9 PUBLIC: [CHEERING]  
 10 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] come on up.  
 11 MR. MCGEE: None of these comments are being  
 12 registered. None of this is making it into the record. I  
 13 need some space. I'm going to try to manage this meeting.  
 14 I don't need any more opinions on how to manage this  
 15 meeting.  
 16 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE]  
 17 MR. MCGEE: I can't -- I would like to turn to elected  
 18 officials.  
 19 PUBLIC: [APPLAUSE]  
 20 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE]  
 21 PUBLIC: [APPLAUSE]  
 22 MR. MCGEE: So the first thing I did tonight before  
 23 this meeting started, was I walked outside to Mr. Pakucko  
 24 and I gave him a card so that he could be one of the first  
 25 speakers and community representatives that could speak in

19

1 the event and that just happened instead. How many people  
 2 are here to say something different or learn something  
 3 from the presentation tonight that came here tonight?  
 4 PUBLIC: No [UNINTELLIGIBLE].  
 5 MR. MCGEE: So here's what's going to happen next.  
 6 Here's what's going to happen next. I'm going to turn to  
 7 the people that you have elected to office --  
 8 PUBLIC: [APPLAUSE]  
 9 MR. MCGEE: -- and I hope you demonstrated enough  
 10 decorum that the people who are in this room can hear them  
 11 speak and we can register their comments. Senator Stern.  
 12 MR. STERN: It's not about me. It's about you. It's  
 13 about you. So --  
 14 UNIDENTIFIED SPEAKER: Where were you all this time?  
 15 MR. STERN: Oh, I, I wasn't [UNINTELLIGIBLE] until  
 16 just now so I'm, I'm trying to work as hard as I can for  
 17 you. I, I just got into office. My name is Henry Stern  
 18 and I'm your State Senator.  
 19 PUBLIC: [APPLAUSE]  
 20 MR. STERN: I know what you're going through. I, I  
 21 was in Porter Ranch the day we discovered the blowout. I  
 22 was at Shepherd of the Hills when hundreds and hundreds  
 23 and hundreds of you showed up. I've seen -- you texted me  
 24 your photos. I've seen the nose bleeds and the nausea.  
 25 I've seen the pets you've lost and the family members that

20

1 have been injured. I know that this is taking courage to  
2 come out here tonight and to share your stories and I want  
3 to thank everybody here. I don't care what organization  
4 you're in. I don't care who you're affiliated with but I  
5 want to take thank you for exercising your Democratic  
6 right to be heard by showing --  
7 PUBLIC: [APPLAUSE]  
8 MR. STERN: I also want to thank the agencies for  
9 showing up tonight to hear you.  
10 PUBLIC: [APPLAUSE]  
11 MR. STERN: I want to thank them for sitting here  
12 listening. I really do appreciate that the PUC and DOGGR  
13 and these agencies are willing to sit on this stage and  
14 feel the outrage in this community because you can get  
15 bogged down in PowerPoints and presentations and  
16 procedure. It's any easy thing to do, but I know this is  
17 much more human, that this is visceral, that this is your  
18 family, this is your kids. So I want you to know that  
19 and that as your public servant here and your other  
20 representatives, your city council, and your supervisor  
21 here, we come from all different political stripes. This  
22 is not about politics tonight. This is about protecting  
23 the community of Porter Ranch in the North Valley. This  
24 is about righting wrongs, and this is about getting your  
25 life back on track.

21

1 PUBLIC: [APPLAUSE]  
2 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE]  
3 MR. STERN: So what I do hope is with all this  
4 pressure that we feel in this room -- all this energy --  
5 that we can channel this, we can channel this outrage into  
6 somewhere constructive and so we're working right now with  
7 the administration to try to get some resolution here. My  
8 simple comment tonight to you all was going to be let's  
9 take a pause here, and let's -- let's wait until we -- we  
10 move into discussing what to do with that gas fuel until  
11 we get to the bottom of what happened there back in October.  
12 PUBLIC: [APPLAUSE]  
13 MR. STERN: We don't know yet. We don't know yet. We  
14 know -- we do know that the staff of DOGGR and the PUC  
15 have been working very diligently over the last 15 months  
16 to check on the safety of a number of of the other wells  
17 and that's what they're going to talk to you tonight. The  
18 central tension is that we still don't have have answers  
19 about SS25 and in that process, in my humble opinion, has  
20 taken too long, but with your energy tonight we can shake  
21 that loose and we can start moving this thing forward. So  
22 they have not made up their minds yet, and I think if they  
23 can hear you and hear each and everyone of you as your  
24 facilitator mentioned, as Caelan mentioned, if we can  
25 structure the rest of this meeting so that getting into

22

1 details of what's happened to each of you, that will  
2 [UNINTELLIGIBLE] impact on these agencies, okay. So know  
3 that you do have recourse through the legislature and that  
4 we have -- we have legislation that is going to be heard  
5 next week to -- to keep that facility shut down.  
6 PUBLIC: [APPLAUSE]  
7 MR. STERN: But we don't have to go that route if we  
8 find some other resolution here tonight, so I will just  
9 submit to you all that your goal should be to find the  
10 quickest possible resolution of this to keep that facility  
11 shut down, to make sure that all the costs and all the  
12 health impacts that you have been in grief with are  
13 rectified, that you don't pay a single cent to the Gas  
14 Company to -- to make them whole because you guys are the  
15 ones who need to be made whole. You all want  
16 [UNINTELLIGIBLE].  
17 PUBLIC: [APPLAUSE]  
18 MR. STERN: So I promise you -- I promise you again that  
19 regardless of political stripe, we are going to be working  
20 hand in hand with the city council, and the Board of  
21 Supervisors, and the State Legislature to make sure that  
22 your voices are heard, but I do -- I want you to give them  
23 a chance and I want you to listen to them. I -- I -- I  
24 appreciate -- we are in an era that exceeds any process,  
25 right? And this outrage does trump any agenda, so I -- I

23

1 -- I -- get that. So thank you for expressing yourselves  
2 with the kind of fervor, but let's get focused now. Let's  
3 go do our homework now and let's get down to details, okay?  
4 So I want to pass the mic over, if appropriate to the  
5 councilman here -- your Councilman, Mitch Englander as  
6 soon as I call this man on the phone, and said, "We need  
7 your help. This is an emergency, and we need to get this  
8 bill moving in case things don't go right." He stepped  
9 up. You should know that about Mitch.  
10 PUBLIC: [APPLAUSE]  
11 MR. STERN: And you should know that about  
12 [UNINTELLIGIBLE] as well, your supervisor. No hesitation.  
13 Didn't even call the Gas Company first to check if this  
14 was okay. We don't need their permission to go forward.  
15 We have your permission.  
16 PUBLIC: [APPLAUSE]  
17 MR. STERN: So your Councilman is here tonight. I'll  
18 let him announce his progress and all the hard work he's  
19 been doing, but listen, I want to thank you, and I want --  
20 again, let's focus here. Let's dig in the details here  
21 and let's -- let's listen to what these folks have to say  
22 and if you don't like what they have to say in the end,  
23 you can walk out of here and you can go to battle; but if  
24 you find what they say compelling then maybe we find our  
25 solution, but what I'm waiting for and my bottom line is

24

1 you. So that's what's going to guide us going forward.  
2 That's the only thing that gives us strength; your vote,  
3 and your faith in our system so thank you for coming out  
4 tonight. We got your back. We got your back.  
5 PUBLIC: [APPLAUSE]  
6 MR. ENGLANDER: I'm Council member Mitchell Englander  
7 for those of you that don't know me. Thank you. Thank  
8 you for -- first of all, our State Senator, let's give it  
9 up.  
10 PUBLIC: [APPLAUSE]  
11 MR. ENGLANDER: I -- I got to tell you, just -- just  
12 listening to everything he just said, I got to tell you,  
13 this is a guy who not only ran and won for the right  
14 reasons that when he says he's got our back in the State  
15 Capital -- and not a lot of people do up there -- quite  
16 frankly in Sacramento, he means it. He walks the walk, he  
17 talks the talk. I really appreciate it. He's a good  
18 friend of this community and we're grateful to have you,  
19 so thank you very much.  
20 PUBLIC: [APPLAUSE]  
21 MR. ENGLANDER: So this community -- first, I want to  
22 address what happened here earlier, and I want to thank  
23 you for coming out and hosting this meeting here in the  
24 community. I'm sorry there wasn't free parking, but  
25 So Cal Gas should pay for the parking.

25

1 PUBLIC: [APPLAUSE]  
2 MR. ENGLANDER: I want to thank you guys for -- for  
3 coming out, and in fact it was interesting because I was  
4 thinking about what's going to happen? Are they going to  
5 shut it down, like, the meeting? Or are they going to  
6 listen a little bit to the passion and the emotion of this  
7 community? And that's what we just saw. This  
8 demonstration -- because I've never witnessed that and I  
9 sit through legislative hearings every day and I've been  
10 at many Town Hall with many of you often. I've led them.  
11 I participated and I've been an audience member through  
12 that, all right. That, that must be SoCal Gas. All  
13 right.  
14 PUBLIC: [APPLAUSE]  
15 MR. ENGLANDER: They -- they don't like it very much.  
16 So through all of that emotion and in coming out here and  
17 what you saw and what I was able to think about before I  
18 came up here on stage what that this community has been  
19 emotionally damaged. They've been psychologically  
20 damaged. They've been physically damaged, financially  
21 damaged, and medically damaged. That's what this is  
22 about.  
23 PUBLIC: [APPLAUSE]  
24 MR. ENGLANDER: And living in fear and living in the  
25 shadow of a facility that should not be co-located with

26

1 the community.  
2 PUBLIC: [APPLAUSE]  
3 MR. ENGLANDER: I started thinking about Henry's Bill.  
4 Let's not even consider -- by the way, his bill does not  
5 say, "Let's reopen once we know the root cause." It says,  
6 "Let's not even have the discussion or consider it until  
7 we know the root cause."  
8 PUBLIC: [APPLAUSE]  
9 MR. ENGLANDER: Now, now with that, I started thinking  
10 about that. You will not get on an airplane that had  
11 engine failure that was grounded and they're telling,  
12 "Well, we're not sure what caused it but go ahead and get  
13 back on."  
14 PUBLIC: [APPLAUSE]  
15 MR. ENGLANDER: Unless we do to make sure that you  
16 don't put us back in that situation and on that airplane.  
17 PUBLIC: [APPLAUSE]  
18 MR. ENGLANDER: Now -- now with that, with that I also  
19 did an emergency piece of legislation to support SB146 and  
20 signed this afternoon by our mayor.  
21 PUBLIC: [APPLAUSE]  
22 MR. ENGLANDER: Hopefully our Mayor Garcetti -- it was  
23 passed unanimously by the Council so I appreciate that,  
24 but that's just a message. It's a resolution. It's a  
25 resolution to say the City of Los Angeles and the Mayor of

27

1 Los Angeles do not want this facility open and we want to  
2 know what happened. That's what that says, so now we've  
3 got support from the Federal Government. We got support  
4 from the State Government. We got support from the  
5 County -- by the way our new supervisor who I think we  
6 already introduced in a moment and we've got the support  
7 from the city but most importantly, we have the support  
8 from the community.  
9 PUBLIC: [APPLAUSE]  
10 MR. ENGLANDER: So -- so we don't care about the science  
11 and the technology hired by the Gas Company tells us at  
12 this point, we want to know what really happened, what  
13 caused it. So it's not that complicated; so that's where  
14 we're at today. Now I really thought about writing a  
15 strong letter that I was going to read into the record  
16 and -- and I didn't do that. I didn't write a letter to  
17 read into the record and I didn't do so because I read one  
18 that I knew I couldn't write better. I was blown away  
19 when I read -- we shouldn't use blown away. We shouldn't  
20 use that. When I read the Porter Ranch Neighborhood  
21 Council letter that was submitted today, that was  
22 submitted as part of the record, I will tell you word-for-  
23 word if -- and I can ask all of you, please, if you read  
24 anything that they -- any of them submit, put that on top  
25 and read it. I support it. I would have been happy to

28

1 sign onto it. It absolutely makes a lot of sense and  
2 [INAUDIBLE] so --  
3 PUBLIC: [APPLAUSE]  
4 MR. ENGLANDER: I want to thank you for doing that. I  
5 want to thank all of you for coming out here and I think  
6 Henry said it best. No matter where you're from, what  
7 organization -- we don't always see eye to eye but we're  
8 always eye to eye on this issue. We're always eye to eye  
9 on protecting our community and protecting our families.  
10 This is a community that I live in. Right outside my  
11 window, do you know what I see? In my home, when I look  
12 out my window, Aliso Canyon. Yeah. No. I see SS25 right  
13 outside my window of my home. That's where I live. I  
14 live in Granada Hills. You can see all the, the whole  
15 facility exactly right from my window of my home. My  
16 family was impacted. I met with many of you and your  
17 children and I've seen what's happened and I want to share  
18 one last thing with you because this to me is personal and  
19 I shared this yesterday for those of you who were in --  
20 council. I wasn't going to talk yesterday. We had  
21 another resolution yesterday. For those of you that know,  
22 that don't know, or may not know, we had a resolution  
23 yesterday to oppose the new [UNINTELLIGIBLE] for EPA.  
24 PUBLIC: [APPLAUSE]  
25 MR. ENGLANDER: And to me, and I think Henry said it

29

1 best, is not a partisan issue for me. We have a  
2 resolution to oppose him because he wants to make sure  
3 that California doesn't have stricter controls in air we  
4 breathe, and the water we drink, and he wants to eliminate  
5 that for us and after what I've experienced, not just with  
6 Aliso, but quite frankly in my life, this week was 11  
7 years ago this week on Monday that my sister died from  
8 asthma at 40 years old and growing up here in the San  
9 Fernando Valley with third-stage smog alerts,  
10 growing up out here where we had to play inside the  
11 classroom much of like what I saw in Aliso, where we had  
12 to relocate 2,000 kids in the two schools during the  
13 holidays. Seeing kids been forced to stay indoors, not  
14 even knowing that the indoor air was clean. That's why I  
15 ran for office, because of what's happened to me and it's  
16 ironic to me and it's quite frankly I'm not lost in it and  
17 I think there's a reason for it that this hearing is this  
18 week; eleven years later, so that means something to me  
19 personally, and for what you guys have been through, I've  
20 been there with you from the beginning. I won't leave  
21 here. I'm there for you until the end. I want to keep  
22 fighting until we make sure that this community stays  
23 whole. We have restored justice and all of you are safe.  
24 PUBLIC: [APPLAUSE]  
25 MR. ENGLANDER: [INAUDIBLE] I truly appreciate it. I

30

1 got a, I got a great honor of introducing somebody who's  
2 really, really special to me, and our supervisor Katherine  
3 Margo [phonetic]. Those of you that know we were on a  
4 trail there and I really got to know this remarkable human  
5 being who is incredibly knowledgeable and passionate who's  
6 got our back on the county none like I ever seen with a  
7 local elected official who really gets and cares about all  
8 of us, and I'm just in awe over her and I'm so glad that  
9 you're our Representative on the Board. So thank you for  
10 being here tonight.  
11 PUBLIC: [APPLAUSE]  
12 MS. MARGO: [UNINTELLIGIBLE] and as many of you know  
13 in this room, we had over 600,000 homes evacuated over a  
14 year ago and the purpose of this hearing is from where I'm  
15 coming from is to let our State Representative, the  
16 Senator, as well as the PUC and DOGGR know that as the  
17 County of Los Angeles and we are united on this. We do  
18 not want that open until we have specific reasons as to  
19 why the leak occurred, how we can guarantee to the  
20 community that it's not going to happen again, and quite  
21 frankly, we want to know is this really a necessary place  
22 for us to be storing gas.  
23 PUBLIC: [APPLAUSE]  
24 MS. MARGO: I'm going to yield my time because as much  
25 as, you know, a political person I can tell you what my

31

1 opinion is. I got County help here who wants to address  
2 seismic concerns, as well -- again, I'm sorry. County  
3 Fire here is going to address seismic concerns and I've  
4 got County up here who's going to discuss health concerns,  
5 but I would really urge you all I plea with you this is  
6 not a political -- this is a bipartisan. This is a  
7 passion. The people in this audience who I've known for  
8 over a year who are frustrated, fed up, and don't feel  
9 like they're being heard, and it is our jobs as electeds  
10 your job as our representatives as well because, in fact,  
11 you are an extension to all of us for you to understand  
12 that in our office over the last two weeks, we've been  
13 called twice by the Gas Company and told that there's  
14 going to be brown outs, possible black outs, and that was  
15 rescinded, and you know, credibility is important.  
16 Credibility is important not only in politics but also as  
17 it relates to what's going on with the Gas Company and the  
18 credibility for a lot of people in this room, and again,  
19 we dealt with the relocation, the fact that there were  
20 many that didn't get [UNINTELLIGIBLE] in timely fashion,  
21 so we understand the frustration you guys have. So with  
22 that, I would like to yield the remainder of my time to  
23 County Fire and the County Health to tell you from their  
24 standpoint because -- again, and I'm talking about the  
25 fact that we have a united front both County and City

32

1 pleading with you, asking you not to move forward with  
2 this. Listen to the Senator. We support the Senator.  
3 The need to ensure that we have answers for the community  
4 should be first and foremost but if you don't believe us,  
5 listen to the experts who are going to deal any of this  
6 catastrophe that takes place who have dealt with it from  
7 County Fire, to the health department and then with that  
8 during public comment that [UNINTELLIGIBLE] leads to a  
9 [UNINTELLIGIBLE]. Right now our attorneys will address  
10 issues such as seep water. There is a question in terms  
11 of legality who are moving forward if given permission  
12 immediately. So with that, I'm going to yield to County  
13 fireman.  
14 PUBLIC: [APPLAUSE].  
15 MR. UFOFF: Thank you supervisor. My name is Walter  
16 Ufoff. I'm an Assistant Chief with the L.A. County Fire  
17 Department, the Health Hazards Materials Division. It was  
18 my staff that reviewed the Southern California Gas Risk  
19 Management Plan that was submitted and we made comments on  
20 that to the DOGGR. It was my supervisor who runs the  
21 CalARP program which is the California Accidental  
22 Release -- Air Release Prevention Program was the one who  
23 reviewed the document. Her job, day-to-day job is to  
24 review RMP reports for approximately 300 facilities or  
25 counties, so she has some experience in this -- in this

33

1 review process. After we reviewed the report, we found  
2 that the report fell short of our expectations. We found  
3 that it was a general plan to address all four of their  
4 facilities, including the Montebello that closed down and  
5 that it was insufficient in detail. What we would like to  
6 see is --is we have provided written comments explaining in  
7 detail what we would like to see of this plan, but we  
8 would like to see that plan become a functional plan by  
9 adding the detail that we requested and to customize the  
10 plan for the Aliso Canyon storage facility, and we'd like  
11 to see that before they start injecting gas.  
12 PUBLIC: [APPLAUSE]  
13 MR. UFOFF: I read the report submitted by the third  
14 party consultants [UNINTELLIGIBLE] and Berkeley and they  
15 agreed that a seismic study needs to be done, needs to be  
16 done out there in the -- at the facility.  
17 PUBLIC: [APPLAUSE]  
18 MR. UFOFF: But what they did say in the report was  
19 that it didn't need to be done immediately. Despite of  
20 our [UNINTELLIGIBLE] and they give reasons for it, but as  
21 the fire department and because of our past seismic  
22 condition out there, we would like to see this report. We  
23 would like to see this study done prior to injecting gas.  
24 PUBLIC: [APPLAUSE]  
25 MR. UFOFF: And lastly, the root cause analysis which

34

1 seen in the agenda -- they're going to discuss the root  
2 cause analysis. We understand that it takes a lot of time  
3 to do a root cause analysis and that it's an comprehensive  
4 plan and that we want it to be accurate and complete, but  
5 we don't want to have them start -- we're uncomfortable  
6 with them in injecting gas before we have to dig through  
7 answers as to what happened out there.  
8 PUBLIC: [APPLAUSE]  
9 MR. BELLEMO: We'll be providing all of our comments  
10 to you in writing. I'm going to just go through a couple  
11 of our concerns right now and although I'm not looking at  
12 you, these are meant for you as well. My name is Angelo  
13 Bellemo. I'm Deputy Director for Health Protection from  
14 the L.A. County Public Health Department. I think that  
15 our supervisor has really referenced the key points that  
16 we want to say tonight, but I wanted to take this time to  
17 mention just a couple of things. This is a community  
18 that's been hit very hard by this disaster, and many  
19 residents continue to report symptoms. We had symptoms  
20 reported as a result of new gas releases as recently as  
21 January 17th, and a natural gas release of this magnitude  
22 has never occurred elsewhere so we really can't predict  
23 its full impact without further study on this.  
24 PUBLIC: [APPLAUSE]  
25 MR. BELLEMO: To the Division of Oil and Gas, we

35

1 really understand the role of the Division as an  
2 overseeing oil and gas production within the state, but  
3 because of the fields close proximity to people, we have  
4 to think of this one a little bit differently than we  
5 would a typical oil and gas production facility.  
6 PUBLIC: [APPLAUSE].  
7 MR. BELLEMO: [UNINTELLIGIBLE] a lot of the expertise  
8 that the the division has in regulating oil and gas  
9 facilities is focused on well integrity, but when you have  
10 people located in such close proximity to this activity  
11 that is a threshold. It is not where we stop, it's really  
12 where we begin.  
13 PUBLIC: [APPLAUSE]  
14 MR. BELLEMO: So for the Division of Oil and Gas, I  
15 think the key point here is that this is a facility where  
16 public health is primary. It's the key priority for all  
17 of us and that as a result, our County Fire Department,  
18 the Air Quality Management District, and the County Public  
19 Health Department have been listening to everyone here who  
20 has experienced the symptoms and we have been trying to  
21 supplement the work that the state regulators are doing.  
22 I wish we in California we had a state regulatory agency  
23 for these types of facilities that was really health  
24 oriented.  
25 PUBLIC: [APPLAUSE]

36

1 MR. BELLEMO: I understand the history here because  
2 I've been doing this type of work for 45 years and the  
3 Division of Oil and Gas was focused on regulating the  
4 industry before understood the full implications of these  
5 types of industry whether located in proximity to people.  
6 I want to just move on and summarize what the three things  
7 are that we're asking for and I won't repeat anything  
8 other than one critical one that the supervisor and my  
9 colleague, Walter, had just referenced. As the -- as the  
10 Division of Oil and Gas considers the decision they've  
11 done [UNINTELLIGIBLE] we want them to consider three key  
12 requirements. We ask for your understanding, your  
13 support, and your commitment to these three requirements,  
14 and we'll be providing this to you in and require it along  
15 in writing along with the other requirements. First, as  
16 the supervisor has said and the fire department the root  
17 cause analysis must be completed before the field resumes  
18 operation, if it resumes operation, and we just have to  
19 understand we can never prevent a reoccurrence of a  
20 disaster without full knowledge of what caused it.  
21 PUBLIC: [APPLAUSE]  
22 MR. BELLEMO: Secondly, irrespective of whether Aliso  
23 resumes operations, we need a continuous monitoring system  
24 to ensure that we can detect and mitigate releases from  
25 that field, that means whether it is operating or whether

37

1 it never operates, there's an infrastructure there that  
2 will have to continue to be monitored sometime in the  
3 future. And third, and again, this is -- I'm only going  
4 to mention one more thing because I'm not going to repeat  
5 what other colleagues have said or others will say, but  
6 the need for a comprehensive health study is necessary  
7 because, we have to determine whether and how the  
8 recurrent and persistent symptoms correlate with emissions  
9 from the field and that's before, during, and after the  
10 incident, and because we're going to continue to see  
11 symptoms appearing.  
12 UNIDENTIFIED SPEAKER: It's still leaking.  
13 MR. BELLEMO: Right. And without this information we  
14 really can't address the health concerns and needs of the  
15 affected residents and they will be unable to achieve as has  
16 been said previously, the necessary closure to move on  
17 with their lives. That's basically it. Thank you very  
18 much. I look forward to [INAUDIBLE].  
19 PUBLIC: [APPLAUSE]  
20 MR. GROSSMAN: So thank you Mr. Harris and Mr. Sullivan  
21 for listening. I appreciate it very much. I'm Scotch  
22 Grossman [phonetic] the board member for the Porter Ranch  
23 area and all of District 3.  
24 PUBLIC: [APPLAUSE].  
25 MR. GROSSMAN: Who I represent, I think, are the most

38

1 important people and that's the kids.  
2 PUBLIC: [APPLAUSE].  
3 MR. GROSSMAN: You know, when we had the gas leak and  
4 we moved our students, it was a tremendous job. We had to  
5 move two schools to two different locations in three  
6 weeks, and we were able to do that and what a lot of  
7 people don't know it wasn't just moving the kids, we were  
8 going to scatter them from the Valley in different places  
9 where we had space but the parents said no. We want our  
10 kids to stay together and we did do that. We did  
11 do that. Porter Ranch kids stay together and  
12 [UNINTELLIGIBLE]. Thank you.  
13 PUBLIC: [APPLAUSE].  
14 MR. GROSSMAN: Not only did we move the kids, we moved  
15 their furniture and you can say, "Why in the world are you  
16 moving their furniture?" We moved their same desks, the  
17 same desks where they put chewing gums underneath. They  
18 had the same desks at the new school. It was part  
19 [UNINTELLIGIBLE]. So you know, we're a very big district.  
20 We go from San Pedro all the way to -- oh, my goodness, to  
21 Astylar. We go from Porter Ranch all the way to East L.A.  
22 and we have seven board members, I am one of the seven,  
23 and on the very rare occasions when school board members  
24 revolve around the same thing -- very rare occasions --  
25 everyone of them voted for the Porter Ranch shut down.

39

1 Everyone single one.  
2 PUBLIC: [APPLAUSE]  
3 MR. GROSSMAN: So now to my official words, I am  
4 opposed to the reopening of the Aliso Canyon natural gas  
5 facility.  
6 PUBLIC: [APPLAUSE]  
7 MR. GROSSMAN: This is in order to protect the public  
8 health and safety of our students, our parents, our  
9 teachers, our staff and our community. My primary  
10 responsibility is to protect the safety of our students.  
11 Relocating these children again is nothing I ever, ever  
12 want to do again. It should never have to happen again,  
13 and without knowing the root cause of the largest gas  
14 blowout in the history of the United States, I cannot  
15 support the reopening of the Aliso Canyon facility.  
16 PUBLIC: [APPLAUSE]  
17 MR. GROSSMAN: That is why I do support Senator's Stern  
18 Senate Bill 146.  
19 PUBLIC: [APPLAUSE]  
20 MR. GROSSMAN: Now looking forward, the L.A. Unified  
21 School District is willing to partner the businesses,  
22 engineers, scientists, and other government agencies to  
23 train and educate our students immediately in clean, safe,  
24 and sustainable energy [INAUDIBLE] storage.  
25 PUBLIC: [APPLAUSE]

40

1 MR. MCGEE: The representative is here from  
2 Congressman Sherman's office or from Senator Einstein's  
3 office.  
4 UNIDENTIFIED PERSON: [UNINTELLIGIBLE]  
5 MR. MCGEE: Please.  
6 MR. CONIUM: Good evening. My name is Cameron Annum.  
7 I'm a life-long resident of the San Fernando Valley and  
8 [UNINTELLIGIBLE] our United States' Senator Dianne  
9 Einstein.  
10 PUBLIC: [APPLAUSE].  
11 MR. CONIUM: Senator Einstein, this issue really  
12 speaks to her. She wanted to be here today but as you  
13 could imagine, Washington DC has her busy, but this  
14 afternoon her and I spoke and she asked me to share these  
15 words with you, if that's okay. She said that, "I have  
16 deep concerns about Aliso Canyon. The massive, natural  
17 gas storage facility hosts 114 wells, some 9,000 feet  
18 deep, and up to 77 years old, all in an earthquake-prone  
19 area. The failure of just one of these wells  
20 took nearly four months to repair, [UNINTELLIGIBLE] an  
21 astonishing 109,000 metric tons of methane. As our  
22 Councilman referenced, now that the housing development  
23 for nearly 30,000 people has grown up around the facility,  
24 our first responsibility must be the safety of the  
25 residents."

41

1 PUBLIC: [APPLAUSE]  
2 MR. CONIUM: "It is absolutely unacceptable that more  
3 than 5,000 families were forced from their homes as a  
4 result of this disaster; conducting inspections, shutting  
5 down the weakest wells in a [UNINTELLIGIBLE] continuously  
6 monitored or good steps, but I have deep concerns about  
7 whether this facility can ever be considered truly safe."  
8 PUBLIC: [APPLAUSE].  
9 MR. CONIUM: "And it is in my view that the most  
10 responsible action will be to permanently shut down  
11 the site."  
12 PUBLIC: [APPLAUSE]  
13 MR. CONIUM: "It is time for Southern California to  
14 stop relying on massive, individual facility that are  
15 prone to failure like Aliso Canyon. We need to redesign  
16 our energy systems to increase flexible, safe, renewable  
17 alternatives [UNINTELLIGIBLE]." Thank you.  
18 PUBLIC: [APPLAUSE]  
19 UNIDENTIFIED PERSON: Very brief from Mr. Sherman. He  
20 lives in Porter Ranch with his family, his three young  
21 daughters, his house is about as close as any  
22 [UNINTELLIGIBLE] 25. He asked that I, I deliver this  
23 statement on his behalf; his words. "Scalars is  
24 responsible for the largest methane leak in U.S. history  
25 and now they want to resume injections into the storage

42

1 facility before the investigation into the leak, into the  
2 cause of the leak is complete. This confirms my concern  
3 that the too-big-to-fail, too-big-to-exist issue at Aliso  
4 Canyon remains unresolved. No one natural gas storage  
5 facility should be so large that its closure can adversely  
6 affect the statewide economy or cause a significant  
7 portion of the state to be without heating, cooking or  
8 electricity, and yet the residents of Porter Ranch, many  
9 of who remain engaged in a legal battle with Scalars over  
10 injuries suffered during last year's blowout are now being  
11 told that injections must resume Aliso Canyon or else run  
12 the risk of blackouts throughout the Los Angeles region?"  
13 PUBLIC: [BOOING]  
14 UNIDENTIFIED PERSON: "[UNINTELLIGIBLE] like Los  
15 Angeles is too reliant on one facility for all of its  
16 power and alternatives should be developed. I'm  
17 encouraged by the State's efforts to build a more  
18 diversified grid and maximize the use battery technology  
19 in order alleviate or [UNINTELLIGIBLE]."  
20 PUBLIC: [APPLAUSE]  
21 UNIDENTIFIED PERSON: "We must proceed with extreme  
22 caution until the strongest possible safety measures are  
23 in place and the cause of last year's leak is fully  
24 understood. The Aliso Canyon facility should hold the  
25 minimum usage necessary in order to ensure reliability.

43

1 You should not even consider [UNINTELLIGIBLE] Scalars  
2 what they want now unless you act simultaneously to  
3 inquire the expeditious limitation [UNINTELLIGIBLE] safety  
4 standard, including [UNINTELLIGIBLE] safety valves.  
5 Additionally, each well should have appropriate live  
6 gauges and monitors that report the finding of  
7 electronically for utilities, state officials, and the  
8 public online. I look forward to working together so this  
9 disaster never happens again in the San Fernando Valley  
10 again." Thank you.  
11 PUBLIC: [APPLAUSE]  
12 MR. MCGEE: Do we have a board member from the Porter  
13 Ranch Neighborhood Council here that would like to speak  
14 at this moment? [UNINTELLIGIBLE]  
15 PUBLIC: [APPLAUSE]  
16 MS. GORMAN-CHANG: Okay. So I'm going to read from  
17 our president's speech. So I like to adjust a little bit.  
18 Obviously my name is not Assam. My name is Susan  
19 Gorman-Chang. I'm the Vice President for Neighborhood  
20 Council representing more than 30,000 residents of the  
21 City of Los Angeles. I'm here speaking on behalf of the  
22 Neighborhood Council not the City of Los Angeles. As  
23 everyone knows, the part of our city council is taking a  
24 clear position on this matter. We believe that this  
25 facility is incompatible with its fervid environment

44

1 because it represents a clear danger to public health as  
2 demonstrated by the four-month disaster, caused by the  
3 catastrophic failure of one of its of a 115 wells.  
4 Yesterday, we, the Porter Ranch Neighborhood City Council,  
5 submitted extensive comments of the findings of the  
6 Department of Conservation regarding the well safety  
7 review and on those of the Public Utilities Commission  
8 regarding the storage volume needs. I will now take  
9 this public testimony time to repeat those comments, but  
10 I do want to articulate our general perspective, and  
11 over-arching position. We are dismayed that in all the  
12 calculations you made by all the engineers and experts, no  
13 one has bothered to factor in the risk to public health.  
14 PUBLIC: [APPLAUSE]  
15 MS. GORMAN-CHANG: When it comes down to cost versus  
16 public health, there should be no argument. In the 21st  
17 century California, we should not be compromising public  
18 health because we don't know what to do with an archaic  
19 energy [UNINTELLIGIBLE].  
20 However, the fact that the gas delivery system  
21 currently depends on Aliso Canyon in a high demand emergency  
22 is not lost with us. To be clear, we are referring to a  
23 real emergency, not a fabricated one.  
24 PUBLIC: [APPLAUSE]  
25 MS. GORMAN-CHANG: We understand that the PUC and Gas

45

1 Company customers are concerned about the tons of  
2 shortages and high demand days. To that end, we are  
3 proposing a very straightforward solution that should be  
4 accepted by everyone. Maintaining Aliso Canyon in it's  
5 current status, which is closed, which is an emergency  
6 supply facility only and not an operating facility, not an  
7 operating facility, okay. [UNINTELLIGIBLE] There needs to  
8 be a clear delineation of what constitutes an emergency  
9 gas leak, not a fabricated one. For example, all supply  
10 lines must be a hundred percent before an emergency  
11 withdrawal takes place. Recognize that the facility is a  
12 clear threat to public health that needs to be retired.  
13 We need that facility decommissioned; right?  
14 [UNINTELLIGIBLE] this facility should be decommissioned.  
15 Identify a clever, expedited schedule for the  
16 [UNINTELLIGIBLE] decommission of this facility and  
17 implement the necessary changes of the gas delivery system  
18 to eliminate the need for Aliso Canyon. We have plenty of  
19 pipes and pipe lines that can get -- get that gas to us  
20 without Aliso Canyon. Yeah. It's been proven. This  
21 approach satisfies any concerns about gas shortages  
22 real or imaginary, while achieving the community's goal of  
23 ending its nightmare. This solution is feasible. It only  
24 needs the state to believe in it and want to implement it.  
25 Our people deserve to have their basic human right to live

46

1 in a safe and healthy environment. God knows that we  
2 have -- God knows we have earned that right after living  
3 through four months of hell and the hell continues and for  
4 anyone to have the audacity to ask us to give more of our  
5 lives and our health in this matter is simply outrageous.  
6 PUBLIC: [APPLAUSE]  
7 MR. MCGEE: May I please ask to see Councilman Edger  
8 Alive [phonetic] to the microphone, please.  
9 MR. ALIVE: Good evening. My name is Edger Alive,  
10 Council member from the city of Mayweed located in  
11 Southeast Los Angeles County. I'm here to speak about the  
12 situation. Natural gas, I believe, is an essential and  
13 much needed resource to fuel Southern California.  
14 Purchasing a lower cost and being able to store it makes  
15 it -- this resource much more affordable for all of us, in  
16 particular to residents in my community with a power level  
17 as close as 30 percent, and that is why this topic is  
18 important to me.  
19 UNIDENTIFIED SPEAKER: Fight for solar.  
20 MR. ALIVE: As the leader and model for clean energy,  
21 no another state tops California; however, our current  
22 infrastructure still relies on 60 percent of our  
23 electricity to be generated by natural gas. I come from a  
24 city that has been heavily polluted for decades with heavy  
25 cancer-causing toxins like arsenic and lead, and

47

1 unfortunately, those are what's responsible -- for  
2 those -- for poisoning our communities have -- have not  
3 been nowhere near as responsive in my opinion are the Gas  
4 Company, and so if Southern California Gas has complied  
5 with all the regulations and technology upgrades, I humbly  
6 ask that [INAUDIBLE].  
7 PUBLIC: [BOOING]  
8 MS. FERNANDEZ: Hello. I'm . I am the  
9 founding CEO of Biffed, an L.A. County business  
10 foundation. We have 325,000 companies employing 3,000,000  
11 people in the 88 cities in Los Angeles County. I'm also  
12 the former publisher of the Los Angeles Daily News, and I  
13 totally appreciate free speech and support your act of  
14 being here communicating with our regulators. I want to  
15 direct my remarks to our agency professionals and experts.  
16 Thank you for holding this forum and coming down to  
17 listen. On behalf of our 3,000,000 families that live  
18 here in the basin and rely on all sorts of energy and  
19 desire the cleanest energy possible so that we can meet  
20 our climate change goals, I ask that you support the safe  
21 reopening of Aliso Canyon.  
22 PUBLIC: [BOOING] [UNINTELLIGIBLE] Shut it all down.  
23 Shut it all down. Shut it all down.  
24 MS. FERNANDEZ: So like you're expressing your  
25 opinions. I'm expressing --

48

1 PUBLIC: [BOOING] [UNINTELLIGIBLE]  
 2 MR. MCGEE: So thank you. Remember how upset you got  
 3 when you felt like I wasn't giving you a chance to speak,  
 4 do you remember that?  
 5 UNIDENTIFIED PERSON: Don't talk down to us.  
 6 MR. MCGEE: I'm suggesting that you follow the same  
 7 rules that you ask for. I'm suggesting that you follow  
 8 the same rules that you ask for. Would you like to  
 9 continue Ms. Fernandez?  
 10 MS. FERNANDEZ: Yes. So I'm here representing 5,000  
 11 employers and 3,000,000 families [UNINTELLIGIBLE].  
 12 PUBLIC: [BOOING] [UNINTELLIGIBLE]  
 13 MS. FERNANDEZ: And so I'm respectful to the  
 14 regulators and experts [UNINTELLIGIBLE].  
 15 MR. MCGEE: The presentation that DOGGR -- the  
 16 presentation that DOGGR previously planned on presenting  
 17 tonight is recorded and is presented online. I'm sure  
 18 that there are some people who are here interested in  
 19 seeing it, but we're going to move right now to public  
 20 comments.  
 21 PUBLIC: [APPLAUSE]  
 22 MR. MCGEE: And you demonstrated, you demonstrated  
 23 what is necessary in order to have this public meeting.  
 24 We're going to have [UNINTELLIGIBLE].  
 25 PUBLIC: [UNINTELLIGIBLE]

49

1 MR. MCGEE: Check, check. All right. First, we're  
 2 going to start at this line and we're going to alternate.  
 3 Please introduce yourselves when you come to the mic. We  
 4 have a timer that we are going to show and that is  
 5 strictly to try to move through these people. I wish I  
 6 could give you all the time that you wanted. We're going  
 7 to give you two minutes and move through the speakers, and  
 8 you will listen to as many people that want to make a  
 9 comment. Please start here.  
 10 MS. WILBUR: My name is Jennifer Wilbur. I'm a  
 11 resident of Crashworthy and a board member of the Porter  
 12 Ranch Neighborhood Council. My family and I have been  
 13 severely impacted by the negligence of the Southern  
 14 California Gas Company and their failure to operate the  
 15 facility which does -- which does not harm the community  
 16 to is located next to. For 112 days, my community was  
 17 poisoned with over 94,000 metric tons of methane gas,  
 18 [UNINTELLIGIBLE], benzene, xylene, toluene, and a variety  
 19 of other toxic chemical which to this this day have never  
 20 been made known to us because SoCalGas claims it is  
 21 proprietary information. I strongly believe that this  
 22 facility has at least prior to the blowout of October  
 23 2015, but we were never made aware of these releases. It  
 24 also been documented that since the [UNINTELLIGIBLE] at  
 25 Aliso Canyon that there have been numerous other releases,

50

1 spills, fires, and leaks. It is not unreasonable to ask  
 2 for that facility to remain closed until the cost of the  
 3 blowout has been determined. It is not unreasonable to  
 4 demand that no release of methane and toxins is acceptable  
 5 from Aliso Canyon.  
 6 PUBLIC: [APPLAUSE]  
 7 MS. MILBAUER: And it is not unreasonable to ask that  
 8 facility to remain shut down until a comprehensive health  
 9 study has been done. The reports of cancer in our  
 10 community have risen drastically, and I am personally  
 11 filled with anxiety about what the long-term health  
 12 effects are of being poisoned by SoCalGas, and I know  
 13 from the experience that I have what the short-term health  
 14 effects are. There are headaches, dizziness, burning  
 15 eyes, blurry vision, nausea, bloody noses, plugged ears,  
 16 sinus inflammation -- just to name a few, and if you allow  
 17 them to reopen this facility, I feel that my family and  
 18 many others will be leaving in droves and will forever  
 19 change the dynamic of a once peaceful community. We never  
 20 knew that the second largest methane gas storage facility  
 21 was in our backyard and it was never too close to us but  
 22 it doesn't matter now, a very dangerous neighborhood with  
 23 reckless disregard for humanity. Thank you. Thank you.  
 24 PUBLIC: [APPLAUSE]  
 25 MR. MCGEE: We're going to cut to this side next.

51

1 After four comments, there are some people who do not have  
 2 the ability to stand in line and wait like this and my  
 3 facilitators are going to bring them a microphone after  
 4 four comments, okay? This side next. Please go right  
 5 ahead.  
 6 MS. LIMESTONE: You insult our intelligence by telling  
 7 us that this gas was stopped at any time, my name is  
 8 Bertha Limestone [phonetic] remember it. I'm the crazy  
 9 lady who said they're poisoning us a year ago, only what  
 10 we didn't know is they were poisoning us well before it.  
 11 PUBLIC: [APPLAUSE].  
 12 MS. LIMESTONE: This is not just Porter Ranch. It's  
 13 throughout the entire Valley. We can smell it in  
 14 Calabasas coming through the canyons. Our friend who  
 15 never had a nose bleed in Tarzana was bleeding. A  
 16 week-and-a-half-ago to two weeks ago, at 6:30 in the  
 17 morning, my husband woke up with uncontrollable bleeding.  
 18 The fire trucks arrived. The ambulance arrived, and what  
 19 happened? He went to Northridge hospital. They don't  
 20 give a damn that we are poisoned. They don't give a damn  
 21 that their property values are zero. They don't give a  
 22 damn about you or the thousands of people who have been  
 23 poisoned. All they care about is their money that they're  
 24 making.  
 25 PUBLIC: [APPLAUSE]

52

1 MS. LIMESTONE: They don't care because Governor  
2 Brown's sister is on the Board. You people have been  
3 poisoned. They don't give a damn. Let all their families  
4 move in. This is an outrage. In our free country that we  
5 can allow you liars to tell us that this has stopped  
6 leaking. You have two-thirds of your wells that have  
7 never even been tested. It never stops. It has been  
8 going and going and going. You tell us to stop. It's a  
9 God damn lie. It's all bullshit. How dare they even say  
10 they may open these wells. These wells need to be closed  
11 forever and all the gas taken out of it. This is  
12 happening in our area and all they cannot stay there. You  
13 need to fight. You need to blockade their God damn wells  
14 and take action because they don't give a damn.  
15 PUBLIC: [APPLAUSE]  
16 MS. LIMESTONE: And you remember that. They don't  
17 care. All they care is about their money and who's  
18 getting paid all for this. Ask that question. Who's  
19 getting a God damn payment? Who are you paying? You are  
20 not paying us. You are destroying our lives and have  
21 destroyed our lives with dizzy spells, blackouts, cancer,  
22 lung infections, sinus infections. The hell with all of  
23 you.  
24 PUBLIC: [CHEERING].  
25 MR. CASEMORE: Ben Casemore [phonetic]. We are one of

53

1 the first families to move up to Northridge Country  
2 Village when it was a North Country Village in South  
3 Porter Ranch. It was in 1985 that fourth residents moved  
4 in. It was just dirt up there. There's thousands  
5 and thousands of homes up there at the moment. Our lives  
6 were completely changed in last October 2015 blowout of  
7 Aliso Canyon. My family immediately felt the effects of  
8 the massive methane an blowout; the largest in U.S.  
9 history, which was approximately one-quarter to one half a  
10 mile away from our home. The bloody noses, severe  
11 headaches, rashes, coughing, fatigue, sore throats, dizzy  
12 spells, sleepless nights -- just to name a few. I'm sure  
13 everyone of us live up at the territory know exactly where  
14 I'm coming from. I have gone to various doctors.  
15 Internists, ENTs, with my bloody noses, cardiologists and  
16 as of yesterday was advised by my nephrologist -- did an  
17 ultrasound of my kidneys and bladder. These various  
18 symptoms were caused by not only the methane gas, the  
19 other contributing factors of the oil that had erupted and  
20 spewed all over my beautiful home, inside and outside.  
21 The inspector that was sent out by the David Morris  
22 company found oil stains all over my house, all over my  
23 three cars. As of today, they're still trying to find out  
24 what are the types of chemicals that are in that well. We  
25 still don't know. I needed -- I need to protect my family

54

1 and we relocated seven months. We were out of our house  
2 in seven different locations. Most of you also relate to  
3 that as well. We have -- we have symptoms when we came  
4 back on weekends. For one hour in the house to water the  
5 plants and would take out the trash or get our mail, we  
6 were sickened by coming into the house for one hour. Our  
7 symptoms just continued. They're still continuing right  
8 now. My children have moved out of our house and are very  
9 concerned about our long-term health as everyone else has.  
10 Shut it down.  
11 PUBLIC: [APPLAUSE]  
12 MR. MCGEE: We -- that's one, two, three -- this is  
13 the fourth, then we're going to go to those who are not  
14 able to stand in line. Obviously, we're going well above  
15 the two minutes. That only matters for those of you  
16 behind the line. Obviously, I can't stop you, so please  
17 right here.  
18 MS. DEROHANIAN: Hello. My name is Cheri Derohanian.  
19 I'm on the Porter Ranch Neighborhood Council; however, I  
20 come to you today as a mother of twin 14 year-old girls  
21 and they -- I'll start. Okay. So our life has not been  
22 the same since October 23rd, 2015. My girls are 8th  
23 graders at Porter Ranch Community School. They were in  
24 7th grade at the time, and that was interesting because on  
25 10-23, it happened on a Friday and Monday through Friday

55

1 the next week they were training for some, you know, some  
2 kind of running competition and we all smelled gas and  
3 they said, "Mr. Morales," the PE teacher, "can we  
4 please -- we don't want to run because it smells like  
5 gas." And it's the closet school to this SS22, 25,  
6 whatever, and they said, "Mom, mom don't call the  
7 principal because we don't want to miss the 5K run or  
8 whatever," and I said, "I'm sorry, but you guys have  
9 borderline asthma." I heard all these stories, people are  
10 getting nose bleeds, I don't think it's safe, and I called  
11 the school. The school didn't know anything about it and  
12 this is on day seven. They've already been running five  
13 miles -- I mean, a mile each day for five days, so the  
14 school didn't know. The office staff at school didn't  
15 know. I asked to speak to the principal all this, and the  
16 school had no emergency plan. You have a fire, you do a  
17 fire drill. You have an earthquake, you do an earthquake  
18 drill. They even have a terrorist drill at the CHP in  
19 West Valley, but guess what? This is the biggest gas leak  
20 ever. They don't have a plan. How do we tell the  
21 schools? How do we tell the residents? They didn't even  
22 put it on those freeway signs like a kid being stolen.  
23 They didn't do the little thing on the TV. Beep, beep,  
24 beep, beep, beep, flash flood. So guess what? My goal is  
25 to start and emergency preparedness committee in Porter

56

1 Ranch and that's just the beginning. Okay. So I think  
2 the thing that I want to talk about is our quality of  
3 life. There's no urgency plan. There's no drills.  
4 There's no nothing, and the ramifications is the  
5 uncertainty. You have an earthquake, it's a few seconds,  
6 and your buildings fall down and you build them back up  
7 and you're done, a few after shocks. You have a fire,  
8 your house burns down, whatever, you have insurance it  
9 comes back. You have a gas leak and you are screwed.  
10 Nobody tell us you. You have all these things and at the  
11 end of the day all we want is to strengthened our  
12 community, enjoy our living, be happy, enjoy our family  
13 and not move our schools, and we just don't want this in  
14 our backyard. Do you? Thank you.  
15 PUBLIC: [APPLAUSE]  
16 MR. MCGEE: Please pass the mic to a participant.  
17 This woman right here.  
18 UNIDENTIFIED SPEAKER: I would like to be able to  
19 speak to the gentleman on stage, please. Respectfully. I  
20 want to let you know that the Gas Company can reliably be  
21 counted on to lie to you and to lie to us. They've done  
22 repeatedly. They -- actually the smells occurred before  
23 in this report. It's been before and you can smell it.  
24 Those of us who live in Chatsworth and Granada Hills  
25 surround Porter Ranch. We suffered as much as Porter

57

1 Ranch but the narrative from the Gas Company is that it  
2 was limited to Porter Ranch, but if you take an aerial  
3 view and you draw a line from well SS25 to Devonshire and  
4 Chatsworth to Devonshire within Granada Hills to  
5 Devonshire at Porter Ranch, it's all the same distance.  
6 And millions of us, several million people in the San  
7 Fernando Valley have suffered. It is not Porter Ranch  
8 alone. Many of the wells are as much as 80 years old. It  
9 was taken over from standard oil. When they say it's just  
10 a storage facility, research tells us that 40 percent of  
11 natural gas has been retailed to other corporations, and  
12 so it travels from Utah, Texas, to us and 40 percent  
13 to other corporations, many of them outside of the United  
14 States and we have to pay the price. I'm elderly now and  
15 when I called the Porter Ranch -- excuse me, the Gas  
16 Company, to ask for help because I was having chest pain,  
17 I was told we're doing nothing for those in Chatsworth and  
18 Granada Hills even though many more of us live there.  
19 We're doing nothing and they wouldn't even talk to me, so  
20 when they transported 5,000 people out of Porter Ranch  
21 those of us who also needed to go, couldn't. And we had no  
22 help from the governor. The Governor's sister is an  
23 [UNINTELLIGIBLE] and the governor did not call a national  
24 emergency. He's the only one who could have done that. A  
25 national emergency would have meant that FEMA came in to

58

1 help those of us who weren't being helped. Lastly, and  
2 this is very important, I think. The Gas Company tells us  
3 us that their last narrative is a scare tactic. They  
4 frightened the news media into saying, "Oh, my goodness.  
5 There won't be energy available in the winter months,"  
6 even though -- even though, Edison has said they have more  
7 than enough to share with us and in fact in yesterday's  
8 newspaper, in yesterday's Los Angeles Times, there was a  
9 story about Edison building a huge battery plant and in no  
10 time at all can supply a lot of energy all over the place,  
11 an excess amount of energy. There is the headline, right  
12 there. Yes. Edison -- Edison can take over. We will not  
13 be without energy. We will not be cold in the winter  
14 because we don't need SoCalGas.  
15 PUBLIC: [APPLAUSE]  
16 UNIDENTIFIED SPEAKER: The wells as much as 80 years  
17 old, have deteriorated, are rusting, and every few days,  
18 we get notifications from the Gas Company on the Internet  
19 saying, "Whoops, we got another spill. Oh, well. Oh,  
20 well." It's time that it shut down. Thank you.  
21 PUBLIC: [APPLAUSE]  
22 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE] in the 80  
23 years that they want from standard oil and it's time to  
24 go. Everything has a life time and they've lived their  
25 life time. Thank you so much.

59

1 PUBLIC: [APPLAUSE]  
2 MR. SYKES: [UNINTELLIGIBLE] Sykes [phonetic]  
3 [UNINTELLIGIBLE] Redondo Beach, we've had a lot of people  
4 stand up yelling about shut the well down. How many  
5 people can stand up and say they knew this storage  
6 facility was in existence two years ago? Why is that?  
7 Why is this facility in the west coast, west of the  
8 Mississippi, three miles wide, 90 million -- 90 billion  
9 cubic feet of gas and nobody in this room knew about it.  
10 I bet the elected officials knew about it. They planned  
11 [UNINTELLIGIBLE] around it. Who would do that? Who  
12 cares? So you take an elected official for results. Many  
13 people say the Gas Company lied to everybody. Maybe if  
14 you put elected officials in charge of the utilities, you  
15 have no liars. I don't think so. So there's a few things  
16 here that I wrote down. In that report that you read,  
17 there was [UNINTELLIGIBLE] that said something about a  
18 well file. Now I've heard of a round file. What is a  
19 round file? The wells people said they're 80 years old,  
20 they're 50 years old, they're 60 years old. This is a  
21 comprehensive safety review. Just a safety review would  
22 have shown maybe what needed to be fixed. Does anybody  
23 remember seeing Nemo? [UNINTELLIGIBLE] was it a gas leak?  
24 Pipes broke? Big fire. [UNINTELLIGIBLE] that's how your  
25 elected officials, the people they appoint to these

60

1 boards, that's how Southern California get. They just  
2 roll with the punches. Somebody just mentioned that a  
3 Southern California Edison ordeal to provide utilities  
4 [UNINTELLIGIBLE] they burn the gas from Southern  
5 California Edison. One hand feeding the other.  
6 [UNINTELLIGIBLE] there was a famous photo of this  
7 lovely -- you need to have [UNINTELLIGIBLE] how scenic is  
8 coming out of Aliso Canyon. You need to hold your  
9 supervisor accountable. Thirty-six years, if you didn't  
10 know, he was blaming the city. He was blaming the city.  
11 The city put the people there. Thirty-thousand people  
12 unincorporated county, the HOAs. The gentleman who spoke  
13 about buying a house in 1985 through a homeowners  
14 association, The thing about homeowner's association,  
15 they're not they're not subject to any government rules.  
16 They don't have to disclose that. You think they knew?  
17 Who sits on a homeowners association when there is no home?  
18 Who sits there? Who makes the rules and regulations. You  
19 need to hold those people accountable also, and you need to  
20 hold yourselves accountable, because you're part of it.  
21 Two years ago you were probably planning for a Labor Day  
22 weekend. Who cares? Now you know. You bring children up  
23 here. You have brought children into this situation while  
24 the facility was in use. Who's fault is that? Not yours.  
25 Not your gas company. It happened because you didn't

61

1 know. Why didn't you know? Because you weren't involved.  
2 You need to get involved. [UNINTELLIGIBLE] I'm down in the  
3 county every God damn week to listen to them lie and tell  
4 us the tales that they do. It's not fair. There's 10  
5 million people who live in this county. They have a voice  
6 [UNINTELLIGIBLE] I'm sorry this leak happened, but it was,  
7 it was [UNINTELLIGIBLE] because it shows me how corrupt  
8 the government is in the County and the State of  
9 California.  
10 PUBLIC: [APPLAUSE]  
11 MR. MCGEE: We're going to this side next. Please  
12 note the number of people in line as you consider the  
13 length of your comments. Please go right ahead.  
14 MR. WALDMAN: Sure. Good evening. I'm Stuart  
15 Waldman. I'm President of the Valley Industry and  
16 Commerce Association, VICA. I respect everyone of you and  
17 believe that every person here should have the right to  
18 speak, no matter which side of the opinion you are on and  
19 now it's my turn.  
20 UNIDENTIFIED SPEAKER: Where do you live?  
21 MR. WALDMAN: I live in the San Fernando Valley. I  
22 represent a hundred thousand businesses in the San  
23 Fernando Valley. Thank you for being respectful. VICA  
24 supports the --  
25 PUBLIC: [BOOING] [UNINTELLIGIBLE]

62

1 MR. WALDMAN: In a Democracy, we let people speak.  
2 You are being disrespectful. No one shouted you down.  
3 From a business and air quality perspective, keep  
4 [UNINTELLIGIBLE].  
5 PUBLIC: [BOOING] [UNINTELLIGIBLE] shame on you.  
6 Shame on you. Shut it down. Shut it down. Shut it down.  
7 MR. MCGEE: So, so we actually have a safety issue  
8 now. This is, this is actually a safety issue now. Hold  
9 on a second. Hold on a second. So -- so the desire to  
10 shut down this facility is quite clear. We hear it. It  
11 is loud. It will remain loud. No confusion, okay? If  
12 that is the only voice that gets to be heard tonight then  
13 there is no reason to continue this meeting, and I'm going  
14 to stop this meeting. If -- if you are willing to keep your  
15 fellow citizens an opportunity to speak, we will continue.  
16 Otherwise, there's no reason -- this is not helping nobody.  
17 They're not learning anything and they're not taking any  
18 comments. [UNINTELLIGIBLE] and actually it's a safety  
19 issue here. [UNINTELLIGIBLE] No. No. You tell me right  
20 now. Are you willing -- sure. You all [UNINTELLIGIBLE]  
21 the safety issue is that with 300 people in the room, if  
22 it loses control, things happen; right? Right?  
23 PUBLIC: [BOOING]  
24 MR. MCGEE: Are you willing to let other people  
25 [UNINTELLIGIBLE] are you willing to let other people

63

1 speak? All of a sudden man -- all of a sudden man member  
2 member. [UNINTELLIGIBLE].  
3 UNIDENTIFIED SPEAKER: [UNINTELLIGIBLE]  
4 UNIDENTIFIED SPEAKER: Hey, guys. Hold on a second.  
5 Relax. Stop, okay? This meeting is going to get shut  
6 down unless you guys calm, okay? Let's turn down the  
7 hysteria. My idea is to let the residents and  
8 stakeholders in the communities that are affected by this  
9 blowout speak first. Is that acceptable, Caelan? Okay.  
10 I'm asking for a [UNINTELLIGIBLE] gas building to just  
11 take a seat and wait until the very end.  
12 PUBLIC: [APPLAUSE]  
13 MR. MCGEE: I, I don't think that's acceptable. This  
14 is a public meeting.  
15 PUBLIC: [BOOING] [UNINTELLIGIBLE]  
16 MR. MCGEE: So, if, if you were unwilling to let  
17 people participate this cannot be a meeting. Are you  
18 willing [UNINTELLIGIBLE] so here's the test, you are going  
19 to decide for us. You. All of you -- please, sir. Okay.  
20 If you like, you are going to decide right now whether  
21 this meeting continues or not. If this gentleman  
22 continues [UNINTELLIGIBLE] okay. I want to thank for  
23 coming this evening. We are [UNINTELLIGIBLE] tomorrow  
24 night. Thank you very much for your participation. This  
25 meeting is now adjourned.

64
