Mergner, Marcia, 1978, The geology of Long Valley, Lassen County, California and Washoe County, Nevada: Colorado School of Mines, M.S. thesis, 59 p., plate 1, scale 1:24,000. Unnamed Quaternary fault along the western edge of Upper Long Valley, north of Beckwourth Pass from: Fraser, W.A., and Nasirian, Farhad, 1981, Reevaluation of seismic hazards for Frenchman, Grizzly Valley, and Antelope Dams: California Department of Water Resources, (unpublished report).
Deino, A.L., 1985, I. Stratigraphy, chemistry, K-Ar dating, and paleomagnetism of the Nine Hills Tuff, California-Nevada; II. Miocene/Oligocene ash-flow tuffs of Seven Lakes Mountain, California-Nevada; III. Improved calibration methods and error estimates for $^{40}K-^{40}Ar$ dating of young rocks: University of California, Berkeley, Ph.D. dissertation, 457 p., figure 2, scale 1:24,000.
Also see: Cinque, M.J., 1979, Geology and uranium mineralization of the Hallelujah Junction, Red Rock Canyon area, Lassen County, California, Washoe County Nevada: University of Nevada, Reno, M.S. thesis, 117 p., plate 1, scale 1:20,000.
Van Couvering, J.A., 1962, Geology of the Chilcoot quadrangle Plumas and Lassen counties, California: University of California, Los Angeles, M.A. thesis, 124 p., plate 13, scale 1:31,250.
56. Stinson, M.C., 1961, Reconnaissance geologic map of the Loyalton 15-minute quadrangle, California: California Division of Mines and Geology unpublished mapping for the State Map Project, scale 1:62,500. (Modifications in Sec. 24, T22N, R16E and Secs. 19 & 30, T22N, R17E MDB&M by D.L. Wagner, 1985.) (Additions and modifications in the Dog Valley and Sardine Peak 7.5-minute quadrangles by G.J. Saucedo, and D.L. Wagner, 1987.) Other additions and modifications from: California Department of Water Resources, 196, (see reference 3). Dog Valley fault from: Hawkins, F.F., LaForge, Roland, and Hansen, R.A., 1986, (see reference 4).
57. Stinson, M.C., 1961, Reconnaissance geologic map of the Sierraville 15-minute quadrangle, California: California Division of Mines and Geology unpublished mapping for the State Map Project, scale 1:62,500. (Additions and modifications by G.J. Saucedo with field assistance from C.W. Jennings and J.D. Morgenthaler, 1983). Modifications in the Antelope Valley area from Cluer, J.K., 1990, (personal communication). Other additions and modifications from: California Department of Water Resources, 1963, (see reference 3).
58. Strand, R.L., 1972, Geology of a portion of the Blue Nose Mountain quadrangle and adjacent areas, Plumas and Sierra counties, California: University of California, Davis, M.S. thesis, 86 p., plate 1, scale 1:24,000.*
59. Tuminas, Alvydas, 1983, Structural and stratigraphic relations in the Grass Valley-Colfax area of the northern Sierra Nevada foothills, California: University of California, Davis, Ph.D. dissertation, 415 p., plate 1, scale 1:24,000. Tertiary stratigraphy from: Chandra, D.K., 1961, (see reference 9); Lindgren, Waldemar, 1900, (see reference 38); and Lindgren, Waldemar, and Turner, H.W., 1895, (see reference 39). Fault modifications in the Lake Combie 7.5-minute quadrangle west of Highway 49 from: Woodward-Clyde Consultants, 1977, Regional geology and tectonics, *in* Earthquake evaluation studies of the Auburn dam area: Unpublished report for the U.S. Bureau of Reclamation, v. 3, 118 p., Appendix B, figure B-1, scale 1:250,000.
60. Turner, H.W., 1897, Geologic Atlas of the United States, Downieville Folio: U.S. Geological Survey Folio 37, scale 1:125,000. (Modifications to Quaternary contacts in the Quincy 7.5-minute quadrangle by G.J. Saucedo, 1985).
61. Unruh, J.R., 1989, Stratigraphy and late Cenozoic deformation in the Oroville area, east-central Sacramento Valley, California: Department of Conservation, Davis Ph.D. dissertation (in preparation), scale approximately 1:100,000.
62. Vaitl, J.D., 1980, Geology and structure of a northern Sierra Nevada foothills melange and adjacent areas, Butte County, California: University of California, Davis, M.S. thesis, 93 p., plate 1, scale 1:24,000.
Also see: Burnett, J.L., 1961 and 1967, (see reference 24).
Dilek, Yildirim, 1985, (see reference 13).
63. Williams, Howel, and Curtis, G.H., 1957, The Sutter Buttes of California; A study of Plio-Pleistocene volcanism: University of California Publications in Geological Sciences, v. 116, 56 p., figure 4, scale approximately 1:70,400.
64. Xenophontos, Costas, 1984, Geology, geophysics, and geochemistry of part of the Smartville complex, northern Sierra Nevada foothills, California: University of California, Davis, Ph.D. thesis, 446 p., plate 1, scale 1:62,500. Tertiary geology around Smartville from: Lindgren, Waldemar and Turner, H.W., 1895, (see reference 39).
65. Yeend, W.E., 1974, Gold bearing grave of the ancestral Yuba River, Sierra Nevada, California: U.S. Geological Survey Professional Paper 772, 44 p., plate 1, scale 1:62,500. Modifications from: Lindgren, Waldemar, 100, (see reference 38); and Lindgren, Waldemar, and Turner H.W., 1895, (see reference 39).
66. Zigan, S.M., 1981, Structure and stratigraphy of the La Porte ophiolitic sequence, northern Sierra Nevada, California: University of California, Davis, M.S. thesis, 100 p., plate 1, scale 1:15,840.

* Thrust fault and melange unit within the Shoo Fly Complex from: Schweickert, R.A., Harwood, D.S., Girty, G.H., and Hanson, R.E., 1984, Tectonic development of the northern Sierra terrane: an accreted late Paleozoic island arc and its basement (Field Trip 5), *in* Lintz, Joseph, Jr., (editor), Western Geological Excursions: Geological Society of America Annual Meeting, Reno, v. 4, p. 1-65, figure 2, scale approximately 1:520,000, figure 5, scale approximately 1:272,000.

INDEX TO GEOLOGIC MAPS USED IN COMPILATION OF THE CHICO QUADRANGLE, CALIFORNIA, 1:250,000
