Tsunami Inundation Map For Emergency Planning
Arcata South Quadrangle County of Humboldt
August 13, 2020

PURPOSE AND LIMITATIONS OF THIS MAP

The tsunami inundation area shown on this map is defined by the U.S. Geological Survey (USGS) quadrangle boundaries and consists of areas that have been modeled to experience inundation due to tsunami waves generated by large undersea events in the Pacific Ocean. The map is not intended to be a comprehensive hazard analysis of all potential tsunami sources. The inundation area is the base scientific data used by local communities as input to the development of Tsunami Hazard Evacuation Plans.

ADDITIONAL INFORMATION

For more information about the tsunami inundation area and related information, please visit the California Geological Survey website at www.conservation.ca.gov/cgs.
