MAP USAGE AND LIMITATIONS
This map identifies areas within San Luis Obispo County where average annual radon levels are at or above a certain level. It is not intended to be used to determine radon levels at specific locations within these areas. Radon levels can vary significantly from place to place, even within the same building. This map is not intended to be a substitute for professional radon testing. For more information about radon, including tips on how to reduce radon levels, visit the California Department of Public Health Radon Program website.
