Part 3: Land Use Conversion from 2016-2018
Due to the large size of this table, it has been split into two tables. Table One has the conversions of all land uses to the Important Farmland categories (Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, and Important Farmland Subtotal) and Table Two has the conversions of all land uses to the remaining land use categories (Grazing Land, Agricultural Farmland Subtotal, Urban and Built-up Land, Other Land, Water Area, and Total Area Inventoried).

Footnote (3): Conversion from Urban and Built-up Land is primarily due to the permanent closure of the Mallard Lake Golf Center, and a lack of sufficient infrastructure and the use of detailed digital imagery to delineate more distinct urban boundaries.

</table>

Footnote (1): Prime Farmland conversion to Other Land is primarily due to mapping portions of Highways 99, 70 and 20, boundary adjustments to levees for the Sacramento and Feather Rivers, Sutter and Tisdale Bypasses, East Side Canal and Cross Canal.

Footnote (2): Grazing Land conversion to Other Land is primarily due to the delineation of low-density housing and riparian areas.

Footnote (3): Conversion from Urban and Built-up Land is primarily due to the permanent closure of the Mallard Lake Golf Center, and a lack of sufficient infrastructure and the use of detailed digital imagery to delineate more distinct urban boundaries.

Footnote (4): Water related conversions are due to linework improvements along the Sacramento and Feather Rivers.
