Section 1: Introduction and Program Summary

Background

The Department of Conservation is pleased to announce funding opportunities for Local and Regional Planning projects. Funding for these projects is available from the California Drought, Water, Parks, Climate, Coastal Protection and Outdoor Access for All Act of 2018 (Proposition 68) through the Department of Conservation’s Working Lands and Riparian Corridors Program. This solicitation specifies the eligibility and evaluation criteria, application process, and grant award and administration processes for Local and Regional Planning projects funded through the Working Lands and Riparian Corridors Program.

California leads the way on greenhouse gas emissions reductions and sound planning will advance those reductions further. This component of the Working Lands and Riparian Corridors Program is designed to assist local governments, regional governments, and planning organizations meet the planning requirements set forth in state law and the challenges of adopting land use plans and integrating strategies to transform communities and create long-term prosperity.

Working Lands and Riparian Corridors Program Guidelines

This solicitation is made pursuant to the Department of Conservation’s Working Lands and Riparian Corridors Program Guidelines (Guidelines) approved on [Month, Day, Year]. The Guidelines set forth the general requirements for projects funded through the Working Lands and Riparian Corridors Program. All projects funded under this solicitation must adhere to the requirements set forth in the Guidelines.

The terms of this solicitation shall control if there is a conflict with the Guidelines.

Funding Availability

$950,000 is available through this solicitation for award for agricultural land conservation planning projects at the local or regional level. Funds not awarded under this solicitation maybe allocated to subsequent solicitations for planning projects or Land Trust Capacity and Project Development solicitation consistent with applicable laws, regulations and policies.

Objectives

Consistent with the Objectives set forth in the Working Lands and Riparian Corridors Program Guidelines (Guidelines), planning projects should achieve the following program objectives:
• Protect agricultural and working lands from conversion to more intensified uses
• Protect natural resources
• Support local governments achieving statewide objectives that
  o Reduce or avoid greenhouse gas emissions
  o Improve air and water quality
  o Promote public health
  o Increase infill and compact development
  o Revitalize urban and community centers
  o Reduce automobile usage and fuel consumption
  o Improve infrastructure systems
  o Promote water conservation
  o Promote energy efficiency and conservation

Natural and Working Lands Planning

While local governments and regional planning groups have developed or are in the process of developing plans and strategies to reduce greenhouse gas emissions, many have yet to include natural and working lands as part of their strategy. To optimize greenhouse gas reductions and public benefits across sectors, the Local and Regional Planning grants will support local and regional planner’s efforts to integrate natural and working lands, specifically agricultural lands, in their planning documents.

TerraCount

TerraCount is a scenario planning tool developed by the Department of Conservation and the Nature Conservancy for use by cities, counties, districts, and other land use planners and decision-makers. TerraCount models the greenhouse gas and natural resource implications of different development patterns and management activities. TerraCount allows planners to evaluate the application of management activities including agricultural activities such as cover cropping, restoration activities such as riparian restoration, and avoided conversion such as avoided conversion of grazed land to cultivated land or agricultural land to development. TerraCount provides reporting for how these activities affect a suite of co-benefits.

For questions about this solicitation please contact the Department of Conservation Working Lands and Riparian Corridors team by email to CFCP@conservation.ca.gov.
Section 2: Project Types, Eligible Grantees, Maximum Awards, and Eligible Costs

This section describes the eligible planning project types, the eligible applicants, maximum grant agreement term and maximum project award. Applicants may apply for funding for multiple project types. Applicants seeking to request funding for multiple project types should submit their request as one application.

The Department of Conservation will accept joint applications from multiple eligible applicants. A successful joint application will include meaningful, actionable, internal and external collaboration and demonstrate a commitment (such as match funding or memorandum of understanding) to the joint application from each participating eligible organization.

At least one eligible applicant for each project type is required, but not every member of a joint application needs to be eligible for each project type.

Project Types, Eligible Applicants and Maximum Awards

1. Climate Action Plans, Natural and Working Lands Component

Local governments can help California meet its SB 32 targets through climate action planning. Climate action plans are comprehensive roadmaps that outline the specific activities that a planning agency will undertake to reduce greenhouse gas emissions.

Grants for this project will fund development of the natural and working lands component of a climate action plan. Agricultural land base conservation must be explicitly included in this plan.

Eligible applicants are counties, cities and other regional planning agencies.

Grants for Climate Action Plans, Natural and Working Lands Component have a duration of two years. The maximum award is $200,000.

2. Sustainable Communities Strategies, Natural and Working Lands Component

To support achievement of the State’s greenhouse gas emissions reduction goals, initially set out in California Assembly Bill 32, and followed by Senate Bill 32, and related amendments, California established the Sustainable Communities and Climate Protection Act. SB 375 incentivizes regional and local planning and building in ways that bring people and destinations closer together through low-carbon, alternative and convenient ways to get around. It requires regional metropolitan planning organizations in California to develop Sustainable Communities Strategies, or long-range plans, which
align transportation, housing, and land use decisions in order to achieve greenhouse gas emissions reduction targets set by the California Air Resources Board.

Grants for this project type will fund the development of natural and working lands components of sustainable communities strategy plans. Grantees must assess important farmland and rangeland, among other natural and working lands categories, within their jurisdiction and develop indicators to monitor the conservation of these resources.

Eligible grantees are Councils of Governments and Municipal Planning Organizations.

Grant agreements have a duration of two years. The maximum award is $200,000.

3. **General Plans, Agricultural Elements or Components**

SB 732 (Stern, Ch. 434, Statutes of 2017) authorizes a city or county to develop an agricultural land element of a general plan or an agricultural land component of an open-space element. Cities and counties that opt to do so must meet certain requirements, including identifying and mapping the jurisdiction’s agricultural lands; establishing a comprehensive set of goals, policies, and objectives to support the long-term protection of agricultural land; designating priority land for conservation; and establishing a set of feasible implementation measures designed to promote those goals, policies, and objectives.

Grants provided under this category will fund the activities necessary to develop and adopt an agricultural land element of a general plan or an agricultural land component of an open-space element that complies with the requirements of SB 732.

Eligible applicants are counties and cities.

Grant agreements have a duration of two years. The maximum award is $200,000.

4. **Specific Plans, Agricultural Conservation Priority Plans**

Existing law does not require local governments to adopt agricultural conservation priority plans. While some local jurisdictions have adopted statements in general plans regarding agricultural conservation, few have regional specific plans that inventory and prioritize agricultural areas to conserve, or that specify other conservation strategies.

Grants provided under this category will fund local governments to develop agricultural conservation priority plans. These plans may take a variety of forms, including establishing land use policies that support agricultural conservation, adopting agricultural conservation easement purchasing programs, creating voluntary incentives to keep agricultural lands in production, or adopting an agricultural economic development strategy.

Eligible applicants are cities, counties, and other local and regional planning agencies.

Grant agreements have a duration of two years. The maximum award is $200,000.
5. TerraCount Adoption

Grants for this project type will develop TerraCount to model the greenhouse gas and natural resource implications of different development matters and management activities within the grantees jurisdiction. Grant funded tasks include creating a GHG inventory of available carbon stocks and land-based greenhouse gas emissions within the jurisdiction, creating a baseline reference scenario, creating a complementary benefits assessment, and preparing a report detailing the TerraCount outputs.

Eligible applicants are counties, cities, Councils of Governments, Municipal Planning Organizations, resource conservation districts, and other local and regional planning agencies. Grantees may apply for a TerraCount Adoption grant as a standalone project or in conjunction with other project types detailed below.

Grants for Terra Count Adoption have a duration of one year. The maximum award is $100,000.

Eligible Costs

Eligible costs are direct costs incurred to complete the scope of work. These costs include:

- fully-burdened staff, stakeholder, contractor, and consultant costs related to the project
- operating costs related to the project.
- Administrative overhead of up to 20%

Only costs incurred during the grant agreement term will be reimbursed. All eligible costs must be supported by appropriate documentation.

Common examples of ineligible costs are:

- Costs that are not related to the funded project
- Costs that occur outside the Grant Agreement term
- Meals, incidentals, tips, per diems, or refreshments for meetings or travel
- Incentive/participation gifts or payments
- Out of state travel.

Disadvantaged Community Benefits

A minimum of 15% of combined grant awards must be used to serve severely disadvantaged communities, as described in the Guidelines.
Grant Agreement

The Department and Grantee will enter into a grant agreement substantially in the form of Appendix B. The grant term will be as stated in the project type description. With written justification and Department approval, the duration of a grant may be extended at the discretion of the Department.
Section 3: Application and Selection

Application Materials and Submission

The application template is provided in Appendix A and is available on the Department of Conservation’s website [https://www.conservation.ca.gov/dlrp/grant-programs](https://www.conservation.ca.gov/dlrp/grant-programs). Applicants should familiarize themselves with the Guidelines and this solicitation notice prior to completing the application.

Please submit all required application materials via email to [CFCP@conservation.ca.gov](mailto:CFCP@conservation.ca.gov). Applications must be received by 11:59 p.m. on the date due. You will receive acknowledgement upon receipt of the application.

Due to the nature of planning projects, consultation with the California Conservation Corps is not necessary and priority will not be awarded for such consultation.

The schedule for this solicitation is provided in the “At-A-Glance” section of this solicitation. The schedule is subject to change.

Details, documents, and any other materials related to this program, such as applications, grant agreements, reports, expenditures, photos, etc., are public records that may be publicly released in accordance with the California Public Records Act (Cal. Gov. Code §§ 6250 et seq.).

Applications received by the deadline will be evaluated using the review process described in the Guidelines.

Do you have the professional staff qualified to develop and successfully implement the proposed project? If not, please describe how you will acquire this expertise.

G. What stakeholders and partners are expected to participate in the project? How will stakeholders, partners and the community be engaged in preparing the plan and kept abreast of planning activities?

H. Will the Project serve disadvantaged communities or severely disadvantaged communities? Please provide sufficient detail about the disadvantaged community or severely disadvantaged community, and provide documentation supporting how the project serves that community.
4. Work Plan

Applicants must provide a detailed work plan that specifies the tasks, sub-tasks, and deliverables that will be performed, including a schedule and cost estimates. The cost estimate and schedule should be of sufficient detail to allow assessment of the applicant’s progress through the work plan at regular intervals. The work plan will be a component of the Grant Agreement if the project is awarded funding.
