### SITUATION

**Current Situation LA County Fire:**

Los Angeles County Fire Department continues to support the contingency Incident Action Plan (IAP) with California Department of Conservation – Division of Oil, Gas, and Geothermal Resources, Los Angeles County Department of Public Health, and Los Angeles County Department of Beaches and Harbors. A Contingency Area Evacuation Guidelines is in place for the well site and adjacent areas. In the unlikely event an evacuation order needs to be issued; we will make immediate notification to law enforcement to begin the evacuations for the impacted community.

**Current Situation DOGGR:**

The Department of Conservation’s Division of Oil, Gas, and Geothermal Resources has posted an update and fact sheet on its website:

[https://www.conservation.ca.gov/dog](https://www.conservation.ca.gov/dog)

**Current Situation LA County Public Health:**

Los Angeles County Department of Public Health continues to coordinate with UC on the development of a Community Health, Safety and Notification Plan. Public Health has also been reviewing available air monitoring data; methane readings remain well below safety levels of concern but are trending above background levels. As a result, Public Health has recommended that the Operator sample for other volatile organic gases during methane peaks and submit results to Public Health for review.

**Current Situation Dept. of Beaches and Harbors:**

The Department of Beaches and Harbors continues to work with MDR Hotels LLC to mitigate light and noise pollution at the site while crews work 24/7 to re-abandon the well.

**Evacuation Orders:** None

**Evacuation Centers:** None

**Road Closures:** None

**Cooperating**

Los Angeles County Sheriff’s Department, Los Angeles City Fire Department, Los
