

COMMUNITY NOTICE

February 18, 2026

Dear Resident,

You are receiving this mailer because the California Geologic Energy Management Division (CalGEM) is working to permanently plug and seal oil wells in your area. In early March 2026, work to permanently plug a well at 7162 Garfield Avenue will begin. CalGEM is a State of California regulatory agency that oversees oil wells to ensure public health and safety.

A map of the site is seen on backside of this notice. This well at 7162 Garfield Avenue is known as "Rex Oil/Montebello-5" and has an API reference number of 0405902334. The area surrounding the site is generally mixed-use surrounded by industrial uses.

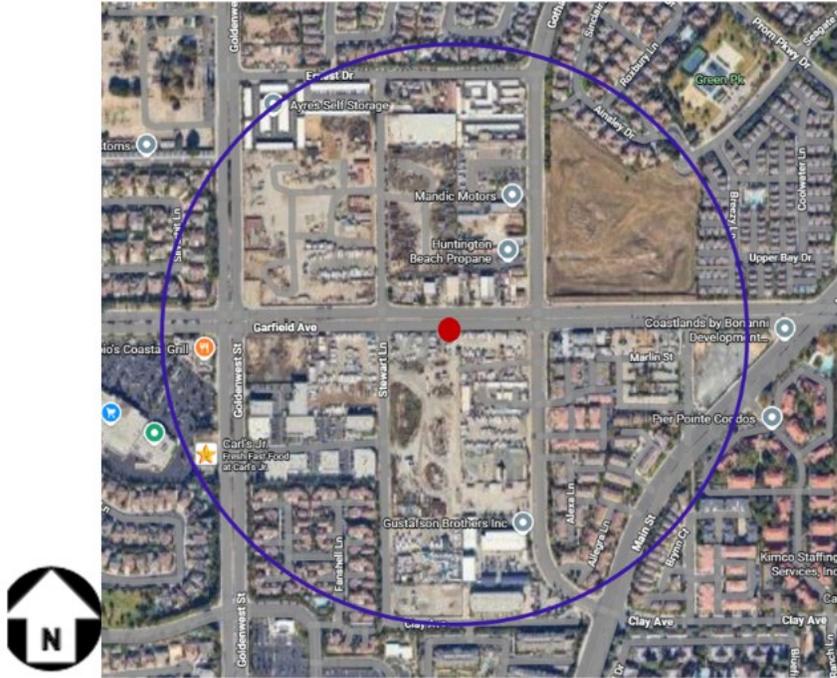

The work should take about a month. It is anticipated that activities will be performed Monday through Friday, between the hours of 7:00 a.m. and 6:00 p.m. This effort is part of California's Project Plug, which addresses the environmental impacts of legacy wells and facilities in our communities across the state. To learn more about this program go to: conservation.ca.gov/projectplug or scan the QR code below.

Driltek, the contractor for the work, has provided CalGEM with systems to address and reduce any possible impacts related to odor, noise, traffic, transportation, dust, vibration, waste, truck, and gas emissions. They have also provided the required Health and Safety Plan and Emergency Response Plan to CalGEM.

If you have any immediate questions or concerns, please contact Sarah Rubin at 916.214.5731 or sarah.rubin@conservation.ca.gov or Jeanette Ochoa at 916-956- 7184 or jeanette.ochoa@conservation.ca.gov (bilingual in Spanish).
