CITY OF OROVILLE

ORDINANCE NO. 1606

AN ORDINANCE REPEALING CHAPTER 23A OF THE OROVILLE CITY CODE
AND RE-ENACTING CHAPTER 23A OF THE OROVILLE CITY CODE PERTAINING
TO SURFACE MINING AND RECLAMATION

WHEREAS, the Oroville Planning Commission has held the required public hearing on the action
described herein and has recommended adoption of this ordinance; and

WHEREAS, the Oroville City Council has held the required public hearings, has found the
proposed action is consistent with the General Plan of the City of Oroville, and is in
the best interest of the City; and

WHEREAS, the Oroville City Council finds that the proposed action is exempt form the
requirements of the California Environmental Quality Act under Section 15370 of the
California Environmental Quality Act Guidelines;

NOW, THEREFORE, the Council of the City of Oroville do ordain as follows:

SECTION 1: Chapter 23A of the Oroville City Code is hereby repealed.

SECTION 2: Chapter 23A of the Oroville City Code is hereby re-enacted to read as follows:

23A-1 Purpose and Intent

The City of Oroville recognizes that the extraction of minerals is essential to the continued
economic well-being of the City and to the needs of society and that the reclamation of mined lands
is necessary to prevent or minimize adverse effects on the environment and to protect the public
health and safety. The City also recognizes that surface mining takes place in diverse areas where the
geologic, topographic, climatic, biological, and social conditions are significantly different and that
reclamation operations and the specifications therefore may vary accordingly.

The purpose and intent of this Chapter is to ensure the continued availability of important
mineral resources, while regulating surface mining operations as required by California's Surface
Mining and Reclamation Act of 1975 (Public Resources Code Sections 2710 et seq.), as amended,
hereinafter referred to as "SMARA", Public Resources Code (PRC) Section 2207 (relating to annual
reporting requirements), and State Mining and Geology Board regulations (hereinafter referred to as
"State regulations") for surface mining and reclamation practice (California Code of Regulations [CCR], Title 14, Division 2, Chapter 8, Subchapter 1, Sections 3500 et seq.), to ensure that:

(a) Adverse environmental effects are prevented or minimized and that mined lands are reclaimed to a usable condition which is readily adaptable for alternative land uses.

(b) The production and conservation of minerals are encouraged, while giving consideration to values relating to recreation, watershed, wildlife, range and forage, and aesthetic enjoyment.

(c) Residual hazards to the public health and safety are eliminated.

23A-2 Definitions

The definitions set forth in this section shall govern the construction of this chapter.

Area of Regional Significance. An area designated by the State Mining and Geology Board which is known to contain a deposit of minerals, the extraction of which is judged to be of prime importance in meeting future needs for minerals in a particular region of the State within which the minerals are located and which, if prematurely developed for alternate incompatible land uses, could result in the premature loss of minerals that are of more than local significance.

Area of Statewide Significance. An area designated by the Board which is known to contain a deposit of minerals, the extraction of which is judged to be of prime importance in meeting future needs for minerals in the State and which, if prematurely developed for alternate incompatible land uses, could result in the permanent loss of minerals that are of more than local or regional significance.

Borrow Pits. Excavations created by the surface mining of rock, unconsolidated geologic deposits or soil to provide material (borrow) for fill elsewhere.

Compatible Land Uses. Land uses inherently compatible with mining and/or that require minimum public or private investment in structures, land improvements, and which may allow mining because of the relative economic value of the land and its improvements. Examples of such uses may include, but shall not be limited to, very low density residential, geographically extensive but low impact industrial, recreational, agricultural, silvicultural, grazing, and open space.

Haul Road. A road along which material is transported from the area of excavation to the processing plant or stock pile area of the surface mining operation.
Idle. Surface mining operations curtailed for a period of one year or more, by more than 90 percent of the operation's previous maximum annual mineral production, with the intent to resume those surface mining operations at a future date.

Incompatible Land Uses. Land uses inherently incompatible with mining and/or that require public or private investment in structures, land improvements, and landscaping and that may prevent mining because of the greater economic value of the land and its improvements. Examples of such uses may include, but shall not be limited to, high density residential, low density residential with high unit value, public facilities, geographically limited but impact intensive industrial, and commercial.

Mined Lands. The surface, subsurface, and ground water of an area in which surface mining operations will be, are being, or have been conducted, including private ways and roads appurtenant to any such area, land excavations, workings, mining waste, and areas in which structures, facilities, equipment, machines, tools, or other materials or property which result from, or are used in, surface mining operations are located.

Minerals. Any naturally occurring chemical element or compound, or groups of elements and compounds, formed from inorganic processes and organic substances, including, but not limited to, coal, peat, and bituminous rock, but excluding geothermal resources, natural gas, and petroleum.

Operator. Any person who is engaged in surface mining operations, or who contracts with others to conduct operations on his/her behalf, except a person who is engaged in surface mining operations as an employee with wages as his/her sole compensation.

Reclamation. The combined process of land treatment that minimizes water degradation, air pollution, damage to aquatic or wildlife habitat, flooding, erosion, and other adverse effects from surface mining operations, including adverse surface effects incidental to underground mines, so that mined lands are reclaimed to a usable condition which is readily adaptable for alternate land uses and create no danger to public health or safety. The process may extend to affected lands surrounding mined lands, and may require backfilling, grading, resoiling, revegetation, soil compaction, stabilization, or other measures.

Stream Bed Skimming. Excavation of sand and gravel from stream bed deposits above the mean summer water level or stream bottom, whichever is higher.
Surface Mining Operations. All, or any part of, the process involved in the mining of minerals on mined lands by removing overburden and mining directly from the mineral deposits, open-pit mining of minerals naturally exposed, mining by the auger method, dredging and quarrying, or surface work incident to an underground mine. Surface mining operations include, but are not limited to, in-place distillation or retorting or leaching, the production and disposal of mining waste, prospecting and exploratory activities, borrow pitting, streambed skimming, and segregation and stockpiling of mined materials (and recovery of same).

23A-3 Incorporation by Reference

The provisions of SMARA (PRC §2710 et seq.), PRC Section 2207, and State regulations CCR §3500 et seq., as those provisions and regulations may be amended from time to time, are made a part of this Chapter by reference with the same force and effect as if the provisions therein were specifically and fully set out herein, excepting that when the provisions of this Chapter are more restrictive than correlative State provisions, this Chapter shall prevail.

23A-4 Scope

Except as provided in this Chapter, no person shall conduct surface mining operations unless a Use Permit, Reclamation Plan, and financial assurances for reclamation have first been approved by the City. Any applicable exemption from this requirement does not automatically exempt a project or activity from the application of other regulations, ordinances or policies of the City, including but not limited to, the application of CEQA, the requirement of Use Permits or other permits, the payment of development impact fees, or the imposition of other dedications and exactions as may be permitted under the law. The provisions of this Chapter shall apply to all lands within the City, public and private.

This Chapter shall not apply to the following activities, subject to the above-references exceptions:

(a) Excavations or grading conducted for farming or on-site construction or for the purpose of restoring land following a flood or natural disaster.

(b) Onsite excavation and onsite earthmoving activities which are an integral and necessary part of a construction project that are undertaken to prepare a site for construction of structures.
landscaping, or other land improvements, including the related excavation, grading, compaction, or
the creation of fills, road cuts, and embankments, whether or not surplus materials are exported from
the site, subject to all of the following conditions:

(1) All required permits for the construction, landscaping, or related land improvements have
been approved by a public agency in accordance with applicable provisions of state law and locally
adopted plans and ordinances, including, but not limited to, the California Environmental Quality Act
("CEQA", Public Resources Code, Division 13, §21000 et seq.).

(2) The City's approval of the construction project included consideration of the onsite
excavation and onsite earthmoving activities pursuant to CEQA.

(3) The approved construction project is consistent with the general plan or zoning of the
site.

(4) Surplus materials shall not be exported from the site unless and until actual construction
work has commenced and shall cease if it is determined that construction activities have terminated,
have been indefinitely suspended, or are no longer being actively pursued.

(c) Operation of a plant site used for mineral processing, including associated onsite
structures, equipment, machines, tools, or other materials, including the onsite stockpiling and onsite
recovery of mined materials, subject to all of the following conditions:

(1) The plant site is located on lands designated for industrial or commercial uses in the
City's general plan.

(2) The plant site is located on lands zoned industrial or commercial, or are contained within
a zoning category intended exclusively for industrial activities by the City.

(3) None of the minerals being processed are being extracted onsite.

(4) All reclamation work has been completed pursuant to the approved Reclamation Plan for
any mineral extraction activities that occurred onsite after January 1, 1976.

(d) Prospecting for, or the extraction of, minerals for commercial purposes and the remova
of overburden in total amounts of less than 1,000 cubic yards on any one parcel in any one location
of one acre or less.
(e) Surface mining operations that are required by federal law in order to protect a mining claim, if those operations are conducted solely for that purpose.

(f) Any other surface mining operations that the State Mining and Geology Board determine to be of an infrequent nature and which involve only minor surface disturbances.

(g) Emergency excavations or grading conducted by the Department of Water Resources or the Reclamation Board for the purpose of averting, alleviating, repairing, or restoring damage to property due to imminent or recent floods, disasters, or other emergencies.

(h) Road construction and maintenance for timber or forest operations if the land is owned by the same person or entity, and if the excavation is conducted adjacent to timber or forest operation roads. This exemption is only available if slope stability and erosion are controlled in accordance with State Mining and Geology Board regulations and, upon closure of the site, the person closing the site implements, where necessary, revegetation measures and postclosure uses in consultation with the Department of Forestry and Fire Protection. This exemption does not apply to onsite excavation or grading that occurs within 100 feet of a Class One watercourse or 75 feet of a Class Two watercourse, or to excavations for materials that are, or have been, sold for commercial purpose.

23A-5 Process

(a) Applications for a Use Permit or Reclamation Plan for surface mining or land reclamation projects shall be made on forms provided by the Planning Department. Said application shall be filed in accord with this Chapter and procedures to be established by the Planning Director and the City Zoning Ordinance. The forms for a Use Permit and/or Reclamation Plan applications shall require at a minimum, each of the elements required by SMARA (§2772-2773) and State regulations, as any other requirements deemed necessary to facilitate an expeditious and fair evaluation of the proposed Reclamation Plan, to be established at the discretion of the Planning Director. As many copies, but not to exceed a maximum of twenty (20) copies, of the Use Permit application as may required by the Planning Director shall be submitted to the Planning Department.

(b) As many copies of a Reclamation Plan application as may be required shall be submit in conjunction with all applications for surface mining operations. For surface mining operations t are exempt from a Use Permit pursuant to this Chapter, the Reclamation Plan application shall.
information concerning the mining operation that is required for processing the Reclamation Plan.

All documentation for the Reclamation Plan shall be submitted to the City at one time.

c (c) Applications shall include all required environmental review forms and information
prescribed by the Planning Director.

d (d) Upon completion of the environmental review procedure and filing of all documents
required by the Planning Director, consideration of the Use Permit or Reclamation Plan for the
proposed or existing surface mine shall be completed pursuant to Section 26-80 of the Zoning
Ordinance at a public hearing before the Planning Commission, and pursuant to Section 2774 of the
Public Resources Code.

e (e) Within thirty (30) days of acceptance of an application for a Use Permit for surface mining
operations and/or a Reclamation Plan as complete, the Planning Department shall notify the State
Department of Conservation of the filing of the application(s). Whenever mining operations are
proposed in the 100-year flood plain of any stream, as shown in Zone A of the Flood Insurance Rate
Maps issued by the Federal Emergency Management Agency, and within one mile, upstream or
downstream, of any state highway bridge, the Planning Department shall also notify the State
Department of Transportation that the application has been received.

(f) The Planning Department shall process the application(s) through environmental review
pursuant to the California Environmental Quality Act (Public Resources Code Sections 21000 et seq.)
and the City’s environmental review guidelines.

(g) Subsequent to the appropriate environmental review, the Planning Department shall
prepare a staff report with recommendations for consideration by the Planning Commission.

(h) The Planning Commission shall hold at least one noticed public hearing on the Use Permit
and/or Reclamation Plan.

(i) Prior to final approval of a Reclamation Plan, financial assurances (as provided in this
Chapter), or any amendments to the Reclamation Plan or existing financial assurances, the Planning
Commission shall certify to the State Department of Conservation that the Reclamation Plan and/or
financial assurance complies with the applicable requirements of State law, and submit the plan,
assurance, or amendments to the State Department of Conservation for review. The Planning
Commission may conceptually approve the Reclamation Plan and financial assurance before submittal to the State Department of Conservation. If a Use Permit is being processed concurrently with the Reclamation Plan, the Planning Commission may simultaneously also conceptually approve the Use Permit. However, the Planning Commission may defer action on the Use Permit until taking final action on the Reclamation Plan and financial assurances. If necessary to comply with permit processing deadlines, the Planning Commission may conditionally approve the Use Permit with the condition that the Planning Department shall not issue the Use Permit for the mining operations until cost estimates for financial assurances have been reviewed by the State Department of Conservation and final action has been taken on the Reclamation Plan and financial assurances.

Pursuant to PRC §774(d), the State Department of Conservation shall be given 30 days to review and comment on the Reclamation Plan and 45 days to review and comment on the financial assurance. The Planning Commission shall evaluate written comments received, if any, from the State Department of Conservation during the comment periods. Staff shall prepare a written response describing the disposition of the major issues raised by the State for the Planning Commission's approval. In particular, when the Planning Commission's position is at variance with recommendations and objections raised in the State's comments, the written response shall address in detail, why specific comments and suggestions were not accepted. Copies of any written comments received and responses prepared by the Planning Commission shall be promptly forwarded to the operator/applicant.

(j) The Planning Commission shall then take action to approve, conditionally approve, deny the Use Permit and/or Reclamation Plan, and to approve the financial assurances pursuant to PRC §7770(d).

(k) The Planning Department shall forward a copy of each approved Use Permit for mining operations and/or approved Reclamation Plan, and a copy of the approved financial assurances to the State Department of Conservation. By July 1 of each year, the Planning Department shall submit to the State Department of Conservation for each active or idle mining operation a copy of the Use Permit or Reclamation Plan amendments, as applicable, or a statement that there have been changes during the previous year.
23A-6 Standards for Reclamation

(a) All Reclamation Plans shall comply with the provisions of SMARA (§2772 and §2773) and State regulations (CCR §3500-3505). Reclamation Plans approved after January 15, 1993, Reclamation Plans for proposed new mining operations, and any substantial amendments to previously approved Reclamation Plans, shall also comply with the requirements for reclamation performance standards (CCR §3700-3713).

(b) The City may impose additional performance standards as developed either in review of individual projects, as warranted, or through the formulation and adoption of City performance standards.

(c) Reclamation activities shall be initiated at the earliest possible time on those portions of the mined lands that will not be subject to further disturbance. Interim reclamation may also be required for mined lands that have been disturbed and that may be disturbed again in future operations. Reclamation may be done on an annual basis, in stages compatible with continuing operations, or on completion of all excavation, removal, or fill, as approved by the City. Each phase of reclamation shall be specifically described in the Reclamation Plan and shall include (a) the beginning and expected ending dates for each phase; (b) all reclamation activities required; (c) criteria for measuring completion of specific reclamation activities; and (d) estimated costs for completion of each phase of reclamation.

23A-7 Statement of Responsibility

The person submitting the Reclamation Plan shall sign a statement accepting responsibility for reclaiming the mined lands in accordance with the Reclamation Plan. Said statement shall be kept by the Planning Department in the mining operation's permanent record. Upon sale or transfer of the operation, the new operator shall submit a signed statement of responsibility to the Planning Department for placement in the permanent record.

23A-8 Findings for Approval

(a) Use Permit. In addition to any findings required by the City Zoning Ordinance, Use Permits for surface mining operations shall include a finding that the project complies with the provisions of SMARA and State regulations.
(b) Reclamation Plans. For Reclamation Plans, the following findings shall be required:

1. That the Reclamation Plan complies with SMARA Sections 2772 and 2773, and any other applicable provisions;

2. That the Reclamation Plan complies with applicable requirements of State regulations (CCR §3500-3505, and §3700-3713).

3. That the Reclamation Plan and potential use of reclaimed land pursuant to the plan are consistent with this Chapter and the City's General Plan and any applicable resource plan or element.

4. That the Reclamation Plan has been reviewed pursuant to CEQA and the City's environmental review guidelines, and all significant adverse impacts from reclamation of the surface mining operations are mitigated to the maximum extent feasible.

5. That the land and/or resources such as water bodies to be reclaimed will be restored to a condition that is compatible with, and blends in with, the surrounding natural environment, topography, and other resources, or that suitable off-site development will compensate for related disturbance to resource values.

6. That the Reclamation Plan will restore the mined lands to a usable condition which is readily adaptable for alternative land uses consistent with the General Plan and applicable resource plan.

7. That a written response to the State Department of Conservation has been prepared, describing the disposition of major issues raised by that Department. Where the City's position is at variance with the recommendations and objections raised by the State Department of Conservation, said response shall address, in detail, why specific comments and suggestions were not accepted.

23A-9 Financial Assurances

(a) To ensure that reclamation will proceed in accordance with the approved Reclamation Plan, the City shall require as a condition of approval security which will be released upon satisfactory performance. The applicant may pose security in the form of a surety bond, trust fund, irrevocable letter of credit from an accredited financial institution, or other method acceptable to the City and the State Mining and Geology Board as specified in State regulations, and which the City reasonably determines are adequate to perform reclamation in accordance with the surface mining operations.
approved Reclamation Plan. Financial assurances shall be made payable to the City of Oroville and
the State Department of Conservation.

(b) Financial assurances will be required to ensure compliance with elements of the
Reclamation Plan, including but not limited to, revegetation and landscaping requirements, restoration
of aquatic or wildlife habitat, restoration of water bodies and water quality, slope stability and erosion
and drainage control, disposal of hazardous materials, and other measures, if necessary.

(c) Cost estimates for the financial assurance shall be submitted to the Planning Department
for review and approval prior to the operator securing financial assurances. The Planning Director
shall forward a copy of the cost estimates, together with any documentation received supporting the
amount of the cost estimates, to the State Department of Conservation for review. If the State
Department of Conservation does not comment within 45 days of receipt of these estimates, it shall
be assumed that the cost estimates are adequate, unless the City has reason to determine that
additional costs may be incurred. The Planning Director shall have the discretion to approve the
financial assurance if it meets the requirements of this Chapter, SMARA, and State regulations.

(d) The amount of the financial assurance shall be based upon the estimated costs of
reclamation for the years or phases stipulated in the approved Reclamation Plan, including any
maintenance of reclaimed areas as may be required, subject to adjustment for the actual amount
required to reclaim lands disturbed by surface mining activities since January 1, 1976, and new lands
to be disturbed by surface mining activities in the upcoming year. Cost estimates should be prepared
by a California registered Professional Engineer and/or other similarly licensed and qualified
professionals retained by the operator and approved by the Planning Director. The estimated amount
of the financial assurance shall be based on an analysis of physical activities necessary to implement
the approved Reclamation Plan, the unit costs for each of these activities, the number of units of each
of these activities, and the actual administrative costs. Financial assurances to ensure compliance with
revegetation, restoration of water bodies, restoration of aquatic or wildlife habitat, and any other
applicable element of the approved Reclamation Plan shall be based upon cost estimates that include
but may not be limited to labor, equipment, materials, mobilization of equipment, administration, and
reasonable profit by a commercial operator other than the permittee. A contingency factor of ten
percent (10%) shall be added to the cost of financial assurances.

(e) In projecting the costs of financial assurances, it shall be assumed without prejudice or
insinuation that the surface mining operation could be abandoned by the operator and, consequently,
the City or State Department of Conservation may need to contract with a third party commercial
company for reclamation of the site.

(f) The financial assurances shall remain in effect for the duration of the surface mining
operation and any additional period until reclamation is completed (including any maintenance
required).

(g) The amount of financial assurances required of a surface mining operation for any one
year shall be adjusted annually to account for new lands disturbed by surface mining operations,
inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan.
The financial assurances shall include estimates to cover reclamation for existing conditions and
anticipated activities during the upcoming year, excepting that the permittee may not claim credit for
reclamation scheduled for completion during the coming year.

(h) Revisions to financial assurances shall be submitted to the Planning Director each ye
prior to the anniversary date for approval of the financial assurances. The financial assurance shall
cover the cost of existing disturbance and anticipated activities for the next calendar year, including
any required interim reclamation. If revisions to the financial assurances are not required, the
operator shall explain, in writing, why revisions are not required.

23A-10 Interim Management Plans

(a) Within 90 days of a surface mining operation becoming idle, the operator shall submit to
the Planning Department a proposed Interim Management Plan (IMP). The proposed IMP shall fully
comply with the requirements of SMARA, including but not limited to all Use Permit conditions, and
shall provide measures the operator will implement to maintain the site in a stable condition, taking
into consideration public health and safety. The proposed IMP shall be submitted on forms provided
by the Planning Department, and shall be processed as an amendment to the Reclamation Plan. IMPs
shall not be considered a project for the purposes of environmental review.

(b) Financial assurances for idle operations shall be maintained as though the operation w...
active, or as otherwise approved through the idle mine’s IMP.

(c) Upon receipt of a complete proposed IMP, the Planning Department shall forward the IMP to the State Department of Conservation for review. The IMP shall be submitted to the State Department of Conservation at least 30 days prior to approval by the Planning Commission.

(d) Within 60 days of receipt of the proposed IMP, or a longer period mutually agreed upon by the Planning Director and the operator, the Planning Commission shall review and approve or deny the IMP in accordance with this Chapter. The operator shall have thirty (30) days, or a longer period mutually agreed upon by the operator and the Planning Director, to submit a revised IMP. The Planning Commission shall approve or deny the revised IMP within sixty (60) days of receipt. If the Planning Commission fails to act on the IMP within sixty (60) days it shall be deemed approved. If the Planning Commission denies the revised IMP, the operator may appeal that action to the City Council.

(e) The IMP may remain in effect for a period not to exceed five years, at which time the Planning Commission may renew the IMP for another period not to exceed five years, or require the surface mining operator to commence reclamation in accordance with its approved Reclamation Plan.

23A-11 Annual Report Requirements

Surface mining operators shall forward an annual surface mining report to the State Department of Conservation and to the City Planning Department on a date established by the State Department of Conservation, upon forms furnished by the State Mining and Geology Board. New mining operations shall file an initial surface mining report and any applicable filing fees with the State Department of Conservation within 30 days of permit approval, or before commencement of operations, whichever is sooner. Any applicable fees, together with a copy of the annual inspection report, shall be forwarded to the State Department of Conservation at the time of filing the annual surface mining report.

23A-12 Inspections

The Planning Department shall arrange for inspection of a surface mining operation within six months of receipt of the Annual Report required in Section 12, to determine whether the surface mining operation is in compliance with the approved Use Permit and/or Reclamation Plan, approved
financial assurances, and State regulations. In no event shall less than one inspection be conducted in any calendar year. Said inspections may be made by a state-registered geologist, state-registered civil engineer, state-licensed landscape architect, or state-registered forester, who is experienced in land reclamation and who has not been employed by the mining operation in any capacity during the previous 12 months, or other qualified specialists, as selected by the Planning Director. All inspections shall be conducted using a form approved and provided by the State Mining and Geology Board.

The Planning Department shall notify the State Department of Conservation within thirty (30) days of completion of the inspection that said inspection has been conducted, and shall forward a copy of said inspection notice and any supporting documentation to the mining operator. The operator shall be solely responsible for the reasonable cost of such inspection.

23A-13 Violations and Penalties

If the Planning Director, based upon an annual inspection or otherwise confirmed by an inspection of the mining operation, determines that a surface mining operation is not in compliance with this Chapter, the applicable Use Permit, any required permit and/or the Reclamation Plan, the City shall follow the procedures set forth in Public Resources Code, Sections 2774.1 and 2774.2 concerning violations and penalties, as well as those provisions of the City Zoning Ordinance for revocation and/or abandonment of a Use Permit which are not preempted by SMARA.

23A-14 Appeals

If the applicant or any protestant is dissatisfied with the action of the Planning Commission they may appeal, in writing, within 15 days to the City Council. The City Council shall set a date for public hearing and give notice to the Planning Commission of such appeal; whereupon the Planning Commission shall submit a written report to the City Council setting forth the reasons for the action taken by the Commission prior to the hearing. The City Council shall render its decision within 30 days of said public hearing.

23A-15 Fees

The City shall establish such fees as it deems necessary to cover the reasonable costs incurred in implementing this Chapter and the State regulations, including but not limited to, processing,
applications, annual reports, inspections, monitoring, enforcement and compliance. Such fees shall
be paid by the operator, as required by the City, at the time of filing of the Use Permit application,
Reclamation Plan application, and at such other times as are determined by the City to be appropriate
in order to ensure that all reasonable costs of implementing this Chapter are borne by the mining
operator.

23A-16  Mineral Resource Protection

Mine development is encouraged in compatible areas before encroachment of conflicting uses.
Mineral resource areas that have been classified by the State Department of Conservation's Division
of Mines and Geology or designated by the State Mining and Geology Board, as well as existing
surface mining operations that remain in compliance with the provisions of this Chapter, shall be
protected from intrusion by incompatible land uses that may impede or preclude mineral extraction
or processing, to the extent possible for consistency with the City's General Plan.

In accordance with PRC §2762, the City's General Plan and resource maps will be updated
to reflect mineral information (classification and/or designation reports) within 12 months of receipt
from the State Mining and Geology Board of such information. Land use decisions within the City
will be guided by information provided on the location of identified mineral resources of regional
significance. Conservation and potential development of identified mineral resource areas will be
considered and encouraged. Recordation on property titles of the presence of important mineral
resources within the identified mineral resource areas may be encouraged as a condition of approval
of any development project in the impacted area. Prior to approving a use that would otherwise be
incompatible with mineral resource protection, conditions of approval may be applied to encroaching
development projects to minimize potential conflicts.

23A-17  Severability

If any section, subsection, sentence, clause or phrase of this Chapter is for any reason held to
be invalid or unconstitutional by the decision of a court of competent jurisdiction, it shall not affect
the remaining portions of this Chapter.
