ORDINANCE 2571
BOARD OF SUPERVISORS, COUNTY OF CALAVERAS
STATE OF CALIFORNIA
March 22, 1999
AMENDMENT TO TITLE 17 OF THE CALAVERAS COUNTY CODE
SURFACE MINING AND RECLAMATION ACT ORDINANCE

PROJECT: 97-88 ZONING AMENDMENT

THE BOARD OF SUPERVISORS OF THE COUNTY OF CALAVERAS DOES ORDAIN AS
FOLLOWS:

SECTION I:
The Board of Supervisors finds that the proposed revisions to the Calaveras County SMARA
regulations is a categorical exemption, Section 15307, Class 7 of Article 19 of the State CEQA
Guidelines, Adoption of the proposed ordinance furthers the protection of natural resources and is
exempt from environmental review.

SECTION II:
The Board of Supervisors further finds:

1. The State of California requires that all public agencies that have mining operations under
their jurisdiction comply with the provisions of Public Resources Code Sections 2710 et seq.,
the 1975 California Surface Mining and Reclamation Act. Should a public agency choose
to not comply with State requirements, the State Mining and Geology Board could take over
all mining permits from the County and penalize the County.

2. The proposed amendments to Title 17, Zoning Ordinance, of the Calaveras County Code will
be consistent with the County role to protect the public health, safety and welfare.

3. The proposed amendments will reflect current practice in administrating the surface mining
and reclamation plans for Calaveras mining operations consistent with changes to State Law.

4. The proposed amendments will assure consistent and timely review of all existing and
proposed mining operations consistent with the county goal to reduce paperwork and
streamline the permit process as much as possible.

5. The proposed amendment is consistent with the County General Plan Conservation Element
regarding the protection of mineral resources and reclamation of minded lands (Pages IV-11
to IV-17).

SECTION III:
The Zoning Ordinance, Title 17 of the Calaveras County Code is hereby amended to delete Section
17.04.050, Exempt Mining and replace Chapter 17.56, Mining Operation Zone of County Code with
the attached as shown in Exhibit "A".
SECTION IV
This Ordinance shall take effect and be in force at the expiration of thirty (30) days from after its passage, and it shall become effective on the 21st day of April, 1999, and before the expiration of fifteen (15) days after its passage, it shall be published in the County of Calaveras.

PASSED AND ADOPTED by the Board of Supervisors of the County of Calaveras at a regular meeting held on the 22nd day of March, 1999, by the following vote of said Board:

AYES: Supervisors Thein, Stein, Callaway & Tryon

NOES: None

ABSENT: Supervisor Bailey

ABSTAIN: None

[Signature]
Chair, Board of Supervisors
County of Calaveras

ATTEST:
[Signature]
County Clerk and Ex-Officio Clerk of the Board of Supervisors
EXHIBIT A

Chapter 17.56

MINERAL EXTRACTION (ME) ZONE

Sections:

17.56.010 Authority.
17.56.020 Purpose.
17.56.030 Applicability.
17.56.040 Exemptions.
17.56.050 Definitions.
17.56.060 Incorporation by Reference.
17.56.070 Vested Rights.
17.56.080 Procedures.
17.56.090 Standards for Reclamation.
17.56.100 Statement of Responsibility.
17.56.110 Findings of Approval.
17.56.120 Financial Assurances.
17.56.130 Interim Management Plans.
17.56.140 Annual Report Requirements.
17.56.150 Inspections.
17.56.160 Violations and Penalties.
17.56.170 Appeals.
17.56.180 Fees.
17.56.190 Mineral Resource Protection.
17.56.200 Severability.

17.56.010 Authority. This title is adopted pursuant to the California’s Surface Mining and Reclamation Act of 1975 (Public Resources Code Sections 2710 et seq.), as amended, hereinafter referred to as "SMARA", Public Resources Code (PRC) Section 2207 (relating to annual reporting requirements), and State Mining and Geology Board regulations (hereinafter referred to as "State regulations") for surface mining and reclamation practice (California Code of Regulations [CCR], Title 14, Division 2, Chapter 8, Subchapter 1, Sections 3500 et seq.)

17.56.020 Purpose. The County of Calaveras recognizes that the extraction of minerals is essential to the continued economic well-being of the County and to the needs of society and that the reclamation of mined lands is necessary to prevent or minimize adverse effects on the environment and to protect the public health and safety. Calaveras County also recognizes that surface mining takes place in diverse areas where the geologic, topographic, climatic, biological, and social conditions are significantly different and that reclamation operations and the specifications therefore may vary accordingly. The purpose and intent of this Chapter is to ensure that:

A. There is continued availability of important mineral resources, while regulating surface mining operations.

B. Adverse environmental effects are prevented or minimized and that mined lands are reclaimed to a usable condition which is readily adaptable for alternative land uses.
C. The production and conservation of minerals are encouraged, while giving consideration to values relating to recreation, watershed, wildlife, range and forage, and aesthetic enjoyment.

D. Residual hazards to the public health and safety are eliminated.

17.56.030 Applicability.
A. Except as provided in this Chapter, no person shall conduct surface mining operations or land reclamation projects unless a permit, Reclamation Plan, and financial assurances for reclamation have first been approved by the County. Any applicable exemption from this requirement does not automatically exempt a project or activity from the application of other regulations, ordinances or policies of the County, including but not limited to, the application of CEQA, the requirement of Development Review, Conditional Use Permits or other permits, the payment of development impact fees, or the imposition of other dedications and exactions as may be permitted under the law.

B. The provisions of this Chapter shall apply to all lands within the jurisdiction of the County. It is the intent of the Board of Supervisors to apply the ME combining zone to all existing and future mining operations requiring a reclamation plan. The County will initiate rezoning those operations currently subject to SMARA without the ME zone, and will require any future operation to concurrently apply for the ME zone with the Reclamation Plan.

C. This title shall be continuously reviewed and revised as necessary in order to ensure that it is in accordance with SMARA.

17.56.040 Exemptions. This Chapter shall not apply to the following activities:
A. Excavations or grading conducted for farming or on-site construction or for the purpose of restoring land following a flood or natural disaster.
B. Onsite excavation and onsite earthmoving activities which are an integral and necessary part of a construction project that are undertaken to prepare a site for construction of structures, landscaping, or other land improvements, including the related excavation, grading, compaction, or the creation of fills, road cuts, and embankments, whether or not surplus materials are exported from the site, subject to all of the following conditions:
   1. All required permits for the construction, landscaping, or related land improvements have been approved by a public agency in accordance with applicable provisions of state law and locally adopted plans and ordinances, including, but not limited to, the California Environmental Quality Act ("CEQA", Public Resources Code, Division 13, §21000 et seq.).
   2. The County’s approval of the construction project included consideration of the onsite excavation and onsite earthmoving activities pursuant to CEQA.
   3. The approved construction project is consistent with the general plan or zoning of the site.
   4. Surplus materials shall not be exported from the site unless and until actual construction work has commenced and shall cease if it is determined that construction activities have terminated, have been indefinitely suspended, or are no longer being actively pursued.
C. Operation of a plant site used for mineral processing, including associated onsite structures, equipment, machines, tools, or other materials, including the onsite stockpiling and onsite recovery of mined materials, subject to all of the following conditions:
1. The plant site is located on lands designated for industrial uses in the Calaveras County General Plan.
2. The plant site is located on lands zoned industrial or commercial.
3. None of the minerals being processed are being extracted onsite.
4. All reclamation work has been completed pursuant to an approved Reclamation Plan for any mineral extraction activities that occurred onsite after January 1, 1976.

D. Prospecting for, exploration of, or extraction of minerals for commercial purposes and the removal of overburden in total amounts of less than 1,000 cubic yards in any one location of one acre or less. The limitation on surface disturbance does not include the clearing or removal of brush and vegetation for access road, or erosion control. The limits are cumulative for any period of time and for any assessor parcel or contiguous ownership of surface rights and/or mineral rights, no matter what size parcel.

1. Exploration operators shall prior to commencement of exploration activities submit a letter to the Director of the Planning Department indicating the extent of exploration activities planned, the assessor parcel number(s), and the section, township and range to the property upon which the activities will occur. Accompanying the letter the operator shall submit a USGS quadrangle map and applicable assessor parcel map(s) indicating the location of the activities.
2. Exploration operators shall be responsible for notifying all local, state, and federal agencies and obtaining all permits as otherwise required for their proposed activities.
3. Exploration operators shall backfill and reseed, with a seed mixture approved by the Agricultural Commissioner, all excavations they create; eliminate any noxious weeds introduced by the operator; and cover and seal all drill holes they create.

E. Surface mining operations that are required by federal law in order to protect a mining claim, if those operations are conducted solely for that purpose.

F. Any other surface mining operations that the State Mining and Geology Board determines to be of an infrequent nature and which involve only minor surface disturbances.

G. The solar evaporation of sea water or bay water for the production of salt and related minerals.

H. Emergency excavations or grading conducted by the Department of Water Resources or the Reclamation Board for the purpose of averting, alleviating, repairing, or restoring damage to property due to imminent or recent floods, disasters, or other emergencies.

I. Road construction and maintenance for timber or forest operations if the land is owned by the same person or entity, and if the excavation is conducted adjacent to timber or forest operation roads. This exemption is only available if slope stability and erosion are controlled in accordance with Board regulations and, upon closure of the site, the person closing the site implements, where necessary, revegetation measures and postclosure uses in consultation with the Department of Forestry and Fire Protection. This exemption does not apply to onsite excavation or grading that occurs within 100 feet of a Class One watercourse or 75 feet of a Class Two watercourse, or to excavations for materials that are, or have been, sold for commercial purposes.
17.56.050 Definitions. The definitions set forth in this section shall govern the construction of this chapter.

A. **Area of Regional Significance.** An area designated by the State Mining and Geology Board which is known to contain a deposit of minerals, the extraction of which is judged to be of prime importance in meeting future needs for minerals in a particular region of the State within which the minerals are located and which, if prematurely developed for alternate incompatible land uses, could result in the premature loss of minerals that are of more than local significance.

B. **Area of Statewide Significance.** An area designated by the State Mining and Geology Board which is known to contain a deposit of minerals, the extraction of which is judged to be of prime importance in meeting future needs for minerals in the State and which, if prematurely developed for alternate incompatible land uses, could result in the permanent loss of minerals that are of more than local or regional significance.

C. **Borrow Pits.** Excavations created by the surface mining of rock, unconsolidated geologic deposits or soil to provide material (borrow) for fill elsewhere.

D. **Compatible Land Uses.** Land uses inherently compatible with mining and/or that require a minimum public or private investment in structures, land improvements, and which may allow mining because of the relative economic value of the land and its improvements. Examples of such uses may include, but shall not be limited to, very low density residential, geographically extensive but low impact industrial, recreational, agricultural, silvicultural, grazing, and open space.

E. **Haul Road.** A road along which material is transported from the area of excavation to the processing plant or stock pile area of the surface mining operation.

F. **Idle.** Surface mining operations curtailed for a period of one year or more, by more than 90 percent of the operation's previous maximum annual mineral production, with the intent to resume those surface mining operations at a future date.

G. **Incompatible Land Uses.** Land uses inherently incompatible with mining and/or that require public or private investment in structures, land improvements, and landscaping and that may prevent mining because of the greater economic value of the land and its improvements. Examples of such uses may include, but shall not be limited to, high density residential, low density residential with high unit value, public facilities, geographically limited but impact intensive industrial, and commercial.

H. **Mined Lands.** The surface, subsurface, and ground water of an area in which surface mining operations will be, are being, or have been conducted, including private ways and roads appurtenant to any such area, land excavations, workings, mining waste, and areas in which structures, facilities, equipment, machines, tools, or other materials or property which result from, or are used in, surface mining operations are located.

I. **Minerals.** Any naturally occurring chemical element or compound, or groups of elements and compounds, formed from inorganic processes and organic substances, including, but not limited to, coal, peat, and bituminous rock, but excluding geothermal resources, natural gas, and petroleum.

J. **Operator.** Any person who is engaged in surface mining operations, or who contracts with others to conduct operations on his/her behalf, except a person who is engaged in surface mining operations as an employee with wages as his/her sole compensation.

K. **Reclamation.** The combined process of land treatment that minimizes water
degradation, air pollution, damage to aquatic or wildlife habitat, flooding, erosion, and other adverse effects from surface mining operations, including adverse surface effects incidental to underground mines, so that mined lands are reclaimed to a usable condition which is readily adaptable for alternate land uses and create no danger to public health or safety. The process may extend to affected lands surrounding mined lands, and may require backfilling, grading, resoiling, revegetation, soil compaction, stabilization, or other measures.

L. **Stream Bed Skimming.** Excavation of sand and gravel from stream bed deposits above the mean summer water level or stream bottom, whichever is higher.

M. **Surface Mining Operations.** All, or any part of, the process involved in the mining of minerals on mined lands by removing overburden and mining directly from the mineral deposits, open-pit mining of minerals naturally exposed, mining by the auger method, dredging and quarrying, or surface work incident to an underground mine. Surface mining operations include, but are not limited to, in place distillation or retorting or leaching, the production and disposal of mining waste, prospecting and exploratory activities, borrow pitting, stream bed skimming, and segregation and stockpiling of mined materials (and recovery of same).

17.56.060 **Incorporation by Reference.** The provisions of SMARA (PRC §2710 et seq.), PRC Section 2207, and State regulations CCR §3500 et seq., as those provisions and regulations may be amended from time to time, are made a part of this Chapter by reference with the same force and effect as if the provisions therein were specifically and fully set out herein, excepting that when the provisions of this Chapter are more restrictive than correlative State provisions, this Chapter shall prevail.

17.56.070 **Vested Rights.** No person who obtained a vested right to conduct surface mining operations prior to January 1, 1976, shall be required to secure a permit to mine, so long as the vested right continues and as long as no substantial changes have been made in the operation except in accordance with SMARA, State regulations, and this Chapter. Where a person with vested rights has continued surface mining in the same area subsequent to January 1, 1976, they shall obtain Calaveras County approval of a Reclamation Plan covering the mined lands disturbed by such subsequent surface mining. In those cases where an overlap exists (in the horizontal and/or vertical sense) between pre and post-Act mining, the Reclamation Plan shall call for reclamation proportional to that disturbance caused by the mining after the effective date of the Act (January 1, 1976). All other requirements of State law and this Chapter shall apply to vested mining operations.

17.56.080 **Procedures.**

A. Applications for a Development Review, Conditional Use Permit and/or Reclamation Plan for surface mining or land reclamation projects shall be made on forms provided by the Planning Department. Said application shall be filed in accord with this Chapter and procedures to be established by the Planning Department. The forms for Reclamation Plan applications shall require, at a minimum, each of the elements required by SMARA (§2772-2773) and State regulations, and any other requirements deemed necessary to facilitate an expeditious and fair evaluation of the proposed Reclamation Plan, to be established at the discretion of the Community Development Director.

B. As many copies of a Reclamation Plan application as may be required shall be submitted in conjunction with all applications for Development Review or Conditional Use Permit
for surface mining operations. For surface mining operations that are exempt from a Conditional Use Permit pursuant to this Chapter, the Reclamation Plan application shall include information concerning the mining operation that is required for processing the Reclamation Plan. All documentation for the Reclamation Plan shall be submitted to the Calaveras County Planning Department at one time.

C. Applications shall include all required environmental review forms and information prescribed by the Planning Department.

D. Upon completion of the environmental review procedure and filing of all documents required by the Planning Department, consideration of the Reclamation Plan and, if required, a Development Review or Conditional Use Permit, for the proposed or existing surface mine shall be pursuant to Title 17, Chapter 17.88 of the Calaveras County Zoning Code at a public hearing before the Planning Commission, and pursuant to Section 2774 of the Public Resources Code.

E. Within thirty (30) days of acceptance of an application as complete for a Reclamation Plan and, if required, a Development Review or Conditional Use Permit, the Planning Department shall notify the State Department of Conservation of the filing of the application(s). Whenever mining operations are proposed in the 100-year flood plain of any stream, as shown in Zone A of the Flood Insurance Rate Maps issued by the Federal Emergency Management Agency, and within one mile, upstream or downstream, of any state highway bridge, the Planning Department shall also notify the State Department of Transportation that the application has been received.

F. The Planning Department shall process the application(s) through environmental review pursuant to the California Environmental Quality Act (Public Resources Code Sections 21000 et seq.) and the Calaveras County's CEQA Guidelines.

G. Subsequent to the appropriate environmental review, the Planning Department shall prepare a staff report, including all comments received, with recommendations for consideration by the Planning Commission.

H. The Planning Commission shall hold at least one noticed public hearing on the Reclamation Plan and, if required, the Conditional Use Permit.

I. Prior to final approval of a Reclamation Plan, financial assurances (as provided in this Chapter), or any amendments to the Reclamation Plan or existing financial assurances, the Planning Commission shall certify to the State Department of Conservation that the Reclamation Plan and/or financial assurance complies with the applicable requirements of State law, and submit the plan, assurance, or amendments to the State Department of Conservation for review. If a Conditional Use Permit is being processed concurrently with the Reclamation Plan, the Planning Commission may simultaneously approve the Conditional Use Permit. However, the Planning Commission may defer action on the Conditional Use Permit until taking final action on the Reclamation Plan and financial assurances. If necessary to comply with permit processing deadlines, the Planning Commission may conditionally approve the Conditional Use Permit with the condition that the Planning Department shall not issue the Conditional use Permit for the mining operations until cost estimates for financial assurances have been reviewed by the State Department of Conservation and final action has been taken by the Planning Commission on the Reclamation Plan and financial assurances.

J. Pursuant to PRC §2774(d), the State Department of Conservation shall be given 30 days to review and comment on the Reclamation Plan and 45 days to review and comment on the financial assurance. The Planning Department shall evaluate written comments received, if any, from the State Department of Conservation during the comment periods. Staff shall prepare a written
response describing the disposition of the major issues raised by the State for the Planning Commission's approval. When the Planning Commission's position is at variance with the recommendations and objections raised in the State's comments, the written response shall address, in detail, why specific comments and suggestions were not accepted. Copies of any written comments received and responses prepared by the Planning Department shall be promptly forwarded to the operator/applicant.

K. The Planning Commission shall then take action to approve, conditionally approve, or deny the Reclamation Plan and, if required, the Conditional Use Permit, and to approve the financial assurances pursuant to PRC §2770(d).

L. The Planning Department shall forward a copy of each approved Reclamation Plan and, if required, Development Review or Conditional Use Permit, and a copy of the approved financial assurances to the State Department of Conservation. By July 1 of each year, the Planning Department shall submit to the State Department of Conservation for each active or idle mining operation a copy of the Development Review, Conditional Use Permit or Reclamation Plan amendments, as applicable, or a statement that there have been no changes during the previous year.

17.56.090 Standards for Reclamation.

A. All Reclamation Plans shall comply with the provisions of SMARA (§2772 and §2773) and State regulations (CCR §3500-3505). Reclamation Plans approved after January 15, 1993, Reclamation Plans for proposed new mining operations, and any substantial amendments to previously approved Reclamation Plans, shall also comply with the requirements for reclamation performance standards (CCR § 3 700-3 713 ).

B. The County may impose additional performance standards either during review of individual projects, as warranted, or through the formulation and adoption of County-wide performance standards.

C. Reclamation activities shall be initiated at the earliest possible time on those portions of the mined lands that will not be subject to further disturbance. Interim reclamation may also be required for mined lands that have been disturbed and that may be disturbed again in future operations. Reclamation may be done on an annual basis, in stages compatible with continuing operations, or on completion of all excavation, removal, or fill, as approved by the County. Each phase of reclamation shall be specifically described in the Reclamation Plan and shall include all of the following:

1. The beginning and expected ending dates for each phase.
2. All reclamation activities required.
3. Criteria for measuring completion of specific reclamation activities.
4. Estimated costs for completion of each phase of reclamation.

17.56.100 Statement of Responsibility. The person submitting the Reclamation Plan shall sign a statement accepting responsibility for reclaiming the mined lands in accordance with the Reclamation Plan. Said statement shall be kept by the Planning Department in the mining operation's permanent record. Upon sale or transfer of the operation, the new operator shall submit a signed statement of responsibility to the Planning Department for placement in the permanent record.
17.56.110  Findings for Approval.

A. Site Approvals. In addition to any findings required by the Calaveras County Zoning Code, Conditional Use Permit for surface mining operations shall include a finding that the project complies with the provisions of SMARA and State regulations.

B. Reclamation Plans. For Reclamation Plans, the following findings shall be required:

1. That the Reclamation Plan complies with SMARA Sections 2772 and 2773, and any other applicable provisions;
2. That the Reclamation Plan complies with applicable requirements of State regulations (CCR §3500-3505, and §3700-3713);
3. That the Reclamation Plan and potential use of reclaimed land pursuant to the plan are consistent with this Chapter and the Calaveras County General Plan and any applicable resource plan or element.
4. That the Reclamation Plan has been reviewed pursuant to CEQA and the Calaveras County environmental review guidelines, and all significant adverse impacts from reclamation of the surface mining operations are mitigated to the maximum extent feasible.
5. That the land and/or resources such as water bodies to be reclaimed will be restored to a condition that is compatible with, and blends in with, the surrounding natural environment, topography, and other resources, or that suitable off-site development will compensate for related disturbance to resource values.
6. That the Reclamation Plan will restore the mined lands to a usable condition which is readily adaptable for alternative land uses consistent with the General Plan and applicable resource plan.
7. That a written response to the State Department of Conservation has been prepared, describing the disposition of major issues raised by that Department. Where the County position is at variance with the recommendations and objections raised by the State Department of Conservation, said response shall address, in detail, why specific comments and suggestions were not accepted.

17.56.120  Financial Assurances.

A. To ensure that reclamation will proceed in accordance with the approved Reclamation Plan, the County shall require as a condition of approval security which will be released upon satisfactory performance. The applicant may pose security in the form of a surety bond, trust fund, irrevocable letter of credit from an accredited financial institution, or other method acceptable to the County and the State Mining and Geology Board as specified in State regulations, and which the County reasonably determines are adequate to perform reclamation in accordance with the surface mining operation's approved Reclamation Plan. Financial assurances shall be made payable to the County of Calaveras and the State Department of Conservation.

B. Financial assurances will be required to ensure compliance with elements of the Reclamation Plan, including but not limited to, revegetation and landscaping requirements, restoration of aquatic or wildlife habitat, restoration of water bodies and water quality, slope stability and erosion and drainage control, disposal of hazardous materials, and other measures, if necessary.

C. Cost estimates for the financial assurance shall be submitted to the Planning Department for review and approval prior to the operator securing financial assurances. The Planning Department shall forward a copy of the cost estimates, together with any documentation received supporting the amount of the cost estimates, to the State Department of Conservation for
review. If the State Department of Conservation does not comment within 45 days of receipt of
these estimates, it shall be assumed that the cost estimates are adequate, unless the County has reason
to determine that additional costs may be incurred. The Planning Department shall save the
discretion to approve the financial assurance if it meets the requirements of this Chapter, SMARA,
and State regulations.

D. The amount of the financial assurance shall be based upon the estimated costs of
reclamation for the years or phases stipulated in the approved Reclamation Plan, including any
maintenance of reclaimed areas as may be required, subject to adjustment for the actual amount
required to reclaim lands disturbed by surface mining activities since January 1, 1976, and new lands
to be disturbed by surface mining activities in the upcoming year. Cost estimates should be prepared
by a California registered Professional Engineer and/or other similarly licensed and qualified
professionals retained by the operator and approved by the Planning Department. The estimated
amount of the financial assurance shall be based on an analysis of physical activities necessary to
implement the approved Reclamation Plan, the unit costs for each of these activities, the number of
units of each of these activities, and the actual administrative costs. Financial assurances to ensure
compliance with revegetation, restoration of water bodies, restoration of aquatic or wildlife habitat,
and any other applicable element of the approved Reclamation Plan shall be based upon cost
estimates that include but may not be limited to labor, equipment, materials, mobilization of
equipment, administration, and reasonable profit by a commercial operator other than the permittee.
A contingency factor of ten percent (10%) shall be added to the cost of financial assurances.

E. In projecting the costs of financial assurances, it shall be assumed without prejudice
or insinuation that the surface mining operation could be abandoned by the operator and,
consequently, the County or State Department of Conservation may need to contract with a third
party commercial company for reclamation of the site.

F. The financial assurances shall remain in effect for the duration of the surface mining
operation and any additional period until reclamation is completed (including any maintenance
required).

G. The amount of financial assurances required of a surface mining operation for any
one year shall be adjusted annually to account for new lands disturbed by surface mining operations,
inflation, and reclamation of lands accomplished in accordance with the approved Reclamation Plan.
The financial assurances shall include estimates to cover reclamation for existing conditions and
anticipated activities during the upcoming year, excepting that the permittee may not claim credit
for reclamation scheduled for completion during the coming year.

H. Revisions to financial assurances shall be submitted to the Planning Department each
year prior to the anniversary date for approval of the financial assurances. The financial assurance
shall cover the cost of existing disturbance and anticipated activities for the next calendar year,
including any required interim reclamation. If revisions to the financial assurances are not required,
the operator shall explain, in writing, why revisions are not required.

17.56.130 Interim Management Plans.

A. Within 90 days of a surface mining operation becoming idle, the operator shall submit
to the Planning Department a proposed Interim Management Plan (IMP). The proposed IMP shall
fully comply with the requirements of SMARA, including but not limited to all Conditional Use
Permit conditions, and shall provide measures the operator will implement to maintain the site in a
stable condition, taking into consideration public health and safety. The proposed IMP detailing the
proposed changes from the approved plan shall be submitted on forms provided by the Planning Department, and shall be processed as a minor amendment to the Reclamation Plan to be reviewed by the Planning Department.

B. Upon receipt of a complete proposed IMP the Planning Department shall:
   1. Review the IMP for deviations from the original plan. Deviations determined by the Community Development Director to be substantial shall require Planning Commission approval.
   2. Forward the IMP to the State Department of Conservation for review. The IMP shall be submitted to the State Department of Conservation at least 30 days prior to the County taking any action on the IMP.

C. Within 60 days of receipt of the proposed IMP, or a longer period mutually agreed upon by the Community Development Director and the operator, the Community Development Director, or the Planning Commission if deemed the reviewing body by the Community Development Director pursuant to subsection (1) above, shall review and approve or deny the IMP in accordance with this Chapter. The operator shall have thirty (30) days, or a longer period mutually agreed upon by the operator and the Community Development Director, to submit a revised IMP. The revised IMP shall be approved or denied within sixty (60) days of receipt. If the IMP is denied, the operator may appeal that action to the appropriate body pursuant to Chapter 17.98 of County Code.

D. An approved IMP for idle operations shall maintain the operation status of "active" for the purposes of section 17.90.040 of the County Code.

E. Financial assurances for idle operations shall be maintained as though the operation were active, or as otherwise approved through the idle mine's IMP.

F. The IMP may remain in effect for a period not to exceed five years, at which time the Community Development Director may renew the IMP for another period not to exceed five years, or require the surface mining operator to commence reclamation in accordance with its approved Reclamation Plan.

17.56.140 Annual Report Requirements. Surface mining operators shall forward an annual surface mining report to the State Department of Conservation and to the Planning Department on a date established by the State Department of Conservation, upon forms furnished by the State Mining and Geology Board. New mining operations shall file an initial surface mining report and any applicable filing fees with the State Department of Conservation within 30 days of permit approval, or before commencement of operations, whichever is sooner. Any applicable fees, together with a copy of the annual inspection report, shall be forwarded to the State Department of Conservation at the time of filing the annual surface mining report.

17.56.150 Inspections.
A. The Planning Department shall arrange for inspection of a surface mining operation within six months of receipt of the Annual Report required in the previous section. Annual Report Requirements, to determine whether the surface mining operation is in compliance with the approved Development Review or Conditional Use Permit and/or Reclamation Plan, approved financial assurances, and State regulations. In no event shall less than one inspection be conducted in any calendar year. Said inspections may be made by a state-registered geologist, state-registered civil engineer, state-licensed landscape architect, or state-registered forester, who is experienced in land
reclamation and who has not been employed by the mining operation in any capacity during the previous 12 months, or other qualified specialists, as selected by the Planning Department. All inspections shall be conducted using a form approved and provided by the State Mining and Geology Board.

B. The Planning Department shall notify the State Department of Conservation within thirty (30) days of completion of the inspection if said inspection has been conducted, and shall forward a copy of said inspection notice and any supporting documentation to the mining operator. The operator shall be solely responsible for the reasonable cost of such inspection.

17.56.160 Violations and Penalties. If the Community Development Director, based upon an annual inspection or otherwise confirmed by an inspection of the mining operation, determines that a surface mining operation is not in compliance with this Chapter, the applicable Development Review or Conditional Use Permit, any required permit and/or the Reclamation Plan, Calaveras County shall follow the procedures set forth in Public Resources Code, Sections 2774.1 and 2774.2 concerning violations and penalties, as well as those provisions of the County Code for revocation and/or abandonment of permits which are not preempted by SMARA.

17.56.170 Appeals. Any person aggrieved by an act or determination of the Planning Department in the exercise of the authority granted herein, shall have the right to appeal. An appeal shall be filed to the appropriate body pursuant to Chapter 17.98 of the County Code.

17.56.180 Fees. The Board of Supervisors shall establish such fees as it deems necessary to cover the reasonable costs incurred in implementing this Chapter and the State regulations, including but not limited to, processing of applications, annual reports, inspections, monitoring, enforcement and compliance. Such fees shall be paid by the operator, as required by the County, at the time of filing of the Development Review or Conditional Use Permit application, Reclamation Plan application, and at such other times as are determined by the Calaveras County to be appropriate in order to ensure that all reasonable costs of implementing this Chapter are borne by the mining operator.

17.56.190 Mineral Resource Protection.

A. Mine development is encouraged in compatible areas before encroachment of conflicting uses. Mineral resource areas that have been classified by the State Department of Conservation's Division of Mines and Geology or designated by the State Mining and Geology Board, as well as existing surface mining operations that remain in compliance with the provisions of this Chapter, shall be protected from intrusion by incompatible land uses that may impede or preclude mineral extraction or processing, to the extent possible for consistency with the Calaveras County General Plan.

B. In accordance with PRC §2762, the Calaveras County General Plan and resource maps will be updated to reflect updated mineral information (classification and/or designation reports) within 12 months of receipt from the State Mining and Geology Board of such information. Land use decisions within the County will be guided by information provided on the location of identified mineral resources of regional significance. Conservation and potential development of identified mineral resource areas will be considered and encouraged. Recordation on property titles of the presence of important mineral resources within the identified mineral resource areas may be
encouraged as a condition of approval of any development project in the impacted area. Prior to approving a use that would otherwise be incompatible with mineral resource protection, conditions of approval may be applied to encroaching development projects to minimize potential conflicts.

17.56.200 Severability. If any section, subsection, sentence, clause or phrase of this Chapter is for any reason held to be invalid or unconstitutional by the decision of a court of competent jurisdiction, it shall not affect the remaining portions of this Chapter.
