Footnote (1): Total Area Inventoried changed in 2018 due to adoption of updated county boundary file; adjacent counties gained or lost corresponding acreages. Statistics representing this change are shown in bottom cells in Part III of table.

Footnote (2): 2016-18 Acreage Changes calculates conversions within existing mapped area; county boundary adjustment acreages not included.

Part 2: Land Committed to Nonagricultural Use

Data not available for Land Committed to Nonagricultural Use.

Part 3: Land Use Conversion from 2016-2018

Due to the large size of this table, it has been split into two tables. Table One has the conversions of all land uses to the Important Farmland categories (Prime Farmland, Farmland of Statewide Importance, Unique Farmland, Farmland of Local Importance, and Important Farmland Subtotal) and Table Two has the conversions of all land uses to the remaining land use categories (Grazing Land, Agricultural Farmland Subtotal, Urban and Built-up Land, Other Land, Water Area, and Total Area Inventoried).

Table One

Footnote (1): Total Area Inventoried changed in 2018 due to adoption of updated county boundary file; adjacent counties gained or lost corresponding acreages. Statistics representing this change are shown in bottom cells in Part III of table.

Footnote (3): Grazing Land conversion to Other Land is primarily due to the delineation of low-density housing and riparian areas.

Footnote (4): Conversion from Urban and Built-up Land is primarily due to the demolition of buildings and homes on Beale Air Force Base, improvements to boundaries for the Yuba County Airport and the use of detailed digital imagery to delineate more distinct urban boundaries.

Footnote (5): Other Land to Water related conversions are due to linework improvements along the Feather and Yuba Rivers.
